SUPPLEMENTARY INFORMATION:

Proposed Project

Evaluation of the Children’s Health Insurance Program Reauthorization Act of 2009 (CHIPRA) Quality Demonstration Grant Program

Section 401(a) of the Children’s Health Insurance Program Reauthorization Act of 2009 (CHIPRA), Public Law 111–3, amended the Social Security Act (the Act) to enact section 1139A (42 U.S.C. 1320b–9a). AHRQ is requesting approval from the Office of Management and Budget (OMB) for data collection to support a national evaluation of the quality demonstration grants authorized under section 1139A(d) of the Act. Evaluating whether the CHIPRA demonstration grants improve the quality of care received by children in Medicaid and CHIP aligns with AHRQ’s mission of improving the quality and effectiveness of health care in the United States.

CHIPRA included funding for five-year grants so that states can demonstrate effective, replicable strategies for improving the quality of children’s health care in Medicaid and CHIP. In February 2010, the U.S. Department of Health and Human Services announced the award of 10 demonstration grants. Six of the grantee states are partnering with other states, for a total of 18 demonstration states. The demonstration states are: Colorado (partnering with New Mexico); Florida (with Illinois); Maine (with Vermont); Maryland (with Wyoming and Georgia); Massachusetts; North Carolina; Oregon (with Alaska and West Virginia); Pennsylvania; South Carolina; and Utah (with Idaho).

These demonstration states are implementing 48 distinct projects in at least one of five possible grant categories, A to E. Category A grantees are experimenting with and/or evaluating the use of new pediatric quality measures. Category B grantees are promoting health information technology (HIT) for improved care delivery and patient outcomes. Category C grantees are expanding person-centered medical homes or other provider-based levels of service delivery. Category D grantees will evaluate the impact of a model pediatric electronic health record. Category E grantees are testing other state-designed approaches to quality improvement in Medicaid and CHIP.

This research has the following goals:

(1) To identify CHIPRA state activities that measurably improve the nation’s health care, especially as it pertains to children.

(2) To develop a deep, systematic understanding of how CHIPRA demonstration states carried out their grant-funded projects.

(3) To understand why the CHIPRA demonstration states pursued certain strategies.

(4) To understand whether and how the CHIPRA demonstration states’ efforts affected outcomes related to knowledge and behavior change in targeted providers and/or consumers of health care.

This study is being conducted by AHRQ through its contractor, Mathematica Policy Research, and two subcontractors, pursuant to AHRQ’s statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement, 42 U.S.C. 299a(a)(1) and (2).

Method of Collection

To achieve the goals of this project the following data collections will be implemented:

(1) Key Staff Interviews—two rounds of semi-structured interviews with key staff directly involved in the design and oversight of grant-funded activities in each of the 18 demonstration states. Key staff includes the project director, project manager, and principal investigator and/or medical director. The purpose of these interviews is to gain insight into the implementation of demonstration projects, to understand contextual factors, and to identify lessons and implications for the broad application and sustainability of projects. Because key staff have the most knowledge of project design and implementation, they will be interviewed annually. This request for OMB approval covers the first two annual interviews with key staff.

(2) Implementation Staff Interviews—semi-structured interviews with staff involved in the day-to-day implementation of grant-funded projects in each of the 18 demonstration states. These staff members include state agency employees, provider trainers or coaches, health IT vendors, and/or project consultants. The purpose of these interviews is to gain insight into the opportunities and challenges related to key technical aspects of project implementation.
