

Number of Respondents: 341.
Number of Annual Responses: 341.
Estimated Time Per Response: 30 minutes.

Total Burden Hours: 171.

Total Annualized Capital/Startup Costs: \$0.

Total Annual costs (operating/maintaining systems or purchasing services): \$0.

Description: The data collected from this survey will provide descriptive information on the current use of Fair Labor Standards Act (FLSA) section 14(c) Special Wage Certificates by Community Rehabilitation Programs in the United States. Specifically, the survey will look at perceived organizational barriers to achieving competitive employment outcomes for individuals with significant disabilities. This will include organizations' perceived training and resource needs related to moving their programs from FLSA section 14(c) to integrated employment outcomes. The information generated by the survey will be used by ODEP for policy analysis and subsequent policy development and recommendations. In addition, Training and Technical Assistance for Providers (T-TAP) will use the information to design and disseminate resources and training materials as well as provide technical assistance to Community Rehabilitation Programs (CRP). Part of disseminating this information will include writing journal articles, fact sheets, online seminars and web postings, conference presentations, or other literature that can be used by ODEP, T-TAP, CRPs, organizations, and others interested in facilitating competitive employment for individuals with disabilities.

Ira Mills,

Departmental Clearance Officer.

BILLING CODE 4510-LX-M

DEPARTMENT OF LABOR

Office of the Secretary

Child Labor Education Initiative

AGENCY: Bureau of International Labor Affairs, Department of Labor.

ACTION: Notice of intent to solicit cooperative agreement applications.

SUMMARY: The U.S. Department of Labor (USDOL), Bureau of International Labor Affairs (ILAB), intends to award approximately U.S. \$29 million to organizations to develop and implement formal, non-formal, and vocational education programs as a means to

combat exploitative child labor in the following countries and regions: Central America (Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua), Ecuador, Indonesia, Southern Africa (Botswana, Lesotho, Namibia, South Africa, and Swaziland), and Turkey. ILAB intends to solicit cooperative agreement applications from qualified organizations (*i.e.*, any commercial, international, educational, or non-profit organization capable of successfully developing and implementing education programs) to implement programs that promote school attendance and provide educational opportunities for working children or children at risk of starting working. The programs should focus on innovative ways to address the many gaps and challenges to basic education found in the countries mentioned above. Please refer to <http://www.dol.gov/sec/regis/fedreg/notices/2002012956.pdf> for an example of a previous notice of availability of funds and solicitation for cooperative agreement applications.

DATES: Specific solicitations for cooperative agreement applications are to be published in the **Federal Register** and remain open for at least 30 days from the date of publication. All cooperative agreements awarded will be made before September 30, 2004.

ADDRESSES: Once solicitations are published in the **Federal Register**, applications must be delivered to: U.S. Department of Labor, Procurement Services Center, 200 Constitution Avenue, NW., Room N-5416, Attention: Lisa Harvey, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Lisa Harvey. E-mail address: harvey-lisa@dol.gov. All inquiries should make reference to the USDOL Child Labor Education Initiative—Solicitations for Cooperative Agreement Applications.

SUPPLEMENTARY INFORMATION: Since 1995, USDOL has supported a worldwide technical assistance program implemented by the International Labor Organization's International Program on the Elimination of Child Labor (ILO-IPEC). In that time, ILAB has provided over \$270 million to ILO-IPEC and other organizations for international technical assistance to combat abusive child labor around the world.

In its FY 2003 appropriations, in addition to funds earmarked for ILO-IPEC, USDOL received \$37 million in two-year funding for the Child Labor Education Initiative to support programs that improve access to basic education in international areas with a high rate of abusive and exploitative child labor. All such FY 2003 funds will be obligated prior to September 30, 2004.

USDOL's Child Labor Education Initiative nurtures the development, health, safety, and enhanced future employability of children around the world by increasing access to basic education for children removed from child labor or at risk of entering it. Eliminating child labor will depend in part on improving access to, quality of, and relevance of education. Without improving educational quality and relevance, children withdrawn from child labor may not have viable alternatives and may return to work or resort to other hazardous means of subsistence.

The Child Labor Education Initiative has the following four goals:

1. Raise awareness of the importance of education for all children and mobilize a wide array of actors to improve and expand education infrastructures;

2. Strengthen formal and transitional education systems that encourage working children and those at risk of working to attend school;

3. Strengthen national institutions and policies on education and child labor; and

4. Ensure the long-term sustainability of these efforts.

When working to increase access to quality basic education, USDOL strives to complement existing efforts to eradicate the worst forms of child labor, to build on the achievements of and lessons learned from these efforts, to expand impact and build synergies among actors, and to avoid duplication of resources and efforts.

Signed in Washington, DC, this 11th day of December, 2003.

Lawrence J. Kuss,
Grant Officer.

BILLING CODE 4510-28-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-261]

Carolina Power and Light Company, H. B. Robinson Steam Electric Plant, Unit 2; Notice of Availability of the Final Supplement 13 to the Generic Environmental Impact Statement for the License Renewal of H. B. Robinson Steam Electric Plant, Unit 2

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has published the final plant-specific supplement to the Generic Environmental Impact Statement (GEIS), NUREG-1437, regarding the renewal of operating

license DPR-23 for an additional 20 years of operation at H. B. Robinson Steam Electric Plant, Unit 2. H. B. Robinson Steam Electric Plant, Unit 2 is located in Darlington County, South Carolina. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

It is stated in Section 9.3 of the report:

Based on (1) the analysis and findings in the GEIS (NRC, 1996; 1999); (2) the ER (Environmental Report) submitted by CP&L (CP&L 2002); (3) consultation with Federal, State, and local agencies; (4) the staff's own independent review; and (5) the staff's consideration of public comments, the recommendation of the staff is that the Commission determine that the adverse environmental impacts of license renewal for H. B. Robinson Steam Electric Plant, Unit 2 are not so great that preserving the option of license renewal for energy-planning decision-makers would be unreasonable.

The final supplement 13 to the GEIS is available electronically for public inspection in the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm.html> (the Public Electronic Reading Room). Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Richard L. Emch, Jr., License Renewal and Environmental Impacts Program, Division of Regulatory Improvement Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Mr. Emch may be contacted at 301-415-1590 or RLE@nrc.gov.

Dated at Rockville, Maryland, this 12th day of December, 2003.

For the Nuclear Regulatory Commission.

Pao-Tsin Kuo,

Program Director, License Renewal and Environmental Impacts, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Workshop on Options for Non-LWR Containment Functional Performance

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of public workshop.

SUMMARY: The Nuclear Regulatory Commission has requested the staff to develop options for containment functional performance requirements and criteria for future non-light water reactors, taking into account design features such as fuel, core, and cooling systems. The options selected will also be used for the development of the new regulatory framework for a risk-informed regulatory structure for advanced reactors.

DATES: January 14, 2004, 8:30 a.m.-5 p.m.

ADDRESSES: Doubletree Hotel; 1750 Rockville Pike; Rockville, MD 20852-1699

FOR FURTHER INFORMATION CONTACT: Shana Browde, Office of Nuclear Regulatory Research, Mail Stop: T-10 F13A, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001, (301) 415-7652, e-mail: srb1@nrc.gov.

SUPPLEMENTARY INFORMATION: This notice serves as initial notification of a public workshop to provide for the exchange of information with all stakeholders regarding the staff's efforts to develop options for containment functional performance requirements and criteria for future non-light water reactors. The meeting will focus on the current work being performed by the NRC staff. A preliminary agenda is attached.

Workshop Meeting Information

The staff intends to conduct a workshop to provide for an exchange of information related to the staff's initial efforts to develop options for containment functional performance requirements and criteria for future non-light water reactors. Persons other than NRC staff and NRC contractors interested in making a presentation at the workshop should notify Shana Browde, Office of Nuclear Regulatory Research, Mail Stop: T-10 F13A, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001, (301) 415-7652, e-mail: srb1@nrc.gov.

Registration

There is no registration fee for the workshop; however, so that adequate space, materials, etc., for the workshop

can be arranged, please provide notification of attendance to Shana Browde, Office of Nuclear Regulatory Research, Mail Stop: T-10 F13A, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001, (301) 415-7652, e-mail: srb1@nrc.gov.

Background

The possibility of using alternatives to the traditional "essentially leak-tight" containment structures for non-LWRs has been the subject of Commission policy review, beginning with SECY-93-092, "Issues Pertaining to the Advanced Reactor (PRISM, MHTGR, and PIUS) and CANDU 3 Designs and Their Relationship to Current Regulatory Requirements," dated April 8, 1993. More recently, in SECY-02-0139, "Plan for Resolving Policy Issues Related to Licensing Non-Light Water Reactor Designs," dated July 22, 2002 the staff informed the Commission of its plan to develop policy options for the design and safety performance of the containment structure and related systems for non-LWRs.

In SECY-03-0047, "Policy Issues Related to Licensing Non-Light-Water Reactor Designs," dated March 28, 2003, staff discussed the policy issue of the conditions, if any, that would be acceptable for licensing a plant without a pressure-retaining containment building. In SECY-03-0047, the staff recommended to the Commission that (1) Functional performance requirements be approved for use in establishing the acceptability of either a pressure retaining, low leakage containment or a non-pressure retaining building for future non-LWR reactor designs and, if approved, (2) the staff develop the functional performance requirements using the guidance contained in the July 30, 1993 Commission Staff Requirements Memorandum (SRM) for SECY-93-092 and the Commission's guidance on the other issues in SECY-03-0047. In the June 26, 2003 SRM for SECY-03-0047, the Commission requested the staff to submit options and recommendations to the Commission on functional performance requirements and criteria for the containment of non-LWRs.

Options for containment functional performance requirements and criteria for future non-LWRs are under development by the staff. The final options and recommendations are due in April 2004. To assist in developing and evaluating the options and in identifying the recommended options, the NRC staff is planning to hold a workshop and solicit feedback from the public. Key considerations for discussion include:
