

www.ferc.gov/docs-filing/ecomment.asp. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P-77-324. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

1. *Description of Request:* The licensee requests a temporary variance of its minimum flow requirements. Specifically, the licensee requests to reduce minimum flows in the East Branch Russian River to 20 cubic feet per second (cfs) from November 1, 2025 to November 30, 2025, so that it can inspect, replace, and repair the upper and lower wood stave penstocks that transport water from the Eel River to the Potter Valley Powerhouse. Normally during this period, the licensee would be required to maintain at least 35 cfs at compliance gauge E-16 in the East Branch Russian River pursuant to Article 52, in addition to other contracted water deliveries. While the repair work on the staves is occurring, the licensee proposes to reroute and deliver reduced flows into a small seasonal creek that also connects to the East Branch Russian River near the powerhouse. This variance request cannot be combined with the earlier variance request, filed February 14, 2025, because the seasonal creek has limited capacity and cannot convey the full volume of flows required during the preceding variance when both Article 52 minimum flows and contracted delivery flows are combined. A temporary staff gage will be installed in

the seasonal creek to monitor flow releases during the variance.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email FERCOnlineSupport@ferc.gov, for TTY, call (202) 502-8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members, and others access

publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Dated: July 25, 2025.

Carlos D. Clay,
Deputy Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2020-0720; FRL-8329-03-OCSPP]

Perchloroethylene (PCE); Regulation Under the Toxic Substances Control Act (TSCA); Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency (EPA or Agency) is seeking public comment to inform its reconsideration of the Toxic Substances Control Act (TSCA) regulation for perchloroethylene (PCE). As promulgated in December 2024, the PCE risk management action addressed the unreasonable risk of injury to health presented by PCE under its conditions of use by requiring various workplace exposure controls, prohibiting certain industrial and commercial uses, and preventing consumer access to the chemical, among other provisions. This request for public comment follows the filing of several legal challenges to the rule in 2025, and EPA's subsequent determination that the PCE regulation under TSCA should be reconsidered through further rulemaking. EPA intends to consider information received in response to this public comment solicitation, and other reasonably available information, to inform the development of any proposed rule to amend the PCE regulation as appropriate.

DATES: Comments must be received on or before August 29, 2025.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPPT-2020-0720, online at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting

and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Technical information: Peter Deck, Existing Chemical Risk Management Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–0488; email address: PCE.TSCA@epa.gov.

General information: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action is directed to the public in general and may be of particular interest to those involved in the manufacture (including import), processing, distribution, use, and disposal of PCE or products containing PCE, related industry trade organizations, non-governmental organizations with an interest in human and environmental health, state and local governments, Tribal Nations, and/or those interested in the assessment or management of risks involving chemical substances and mixtures regulated under TSCA. As such, the Agency has not attempted to describe all the specific entities that this action might apply to. If you need help determining applicability, consult the technical contact listed **FOR FURTHER INFORMATION CONTACT**.

B. What is the Agency's authority for taking this action?

Under TSCA section 6(a) (15 U.S.C. 2605(a)), if the Agency determines through a TSCA section 6(b) risk evaluation that the manufacture, processing, distribution in commerce, use or disposal of a chemical substance presents an unreasonable risk of injury to health or the environment, EPA must by rule apply one or more requirements listed in TSCA section 6(a)(1)–(7) to the extent necessary so that the chemical substance or mixture no longer presents such risk.

C. What action is the Agency taking?

On December 18, 2024, EPA released the final risk management rule for PCE titled “Perchloroethylene (PCE); Regulation Under the Toxic Substances Control Act (TSCA)” (89 FR 103560, December 18, 2024) (FRL–8329–01–OCSPP) (hereinafter “PCE final rule”).

Following its publication, EPA received several petitions for review related to the rule. These petitions for review were consolidated in the U.S. Court of Appeals for the Fifth Circuit. The Court granted a temporary abeyance in the litigation through August 21, 2025.

On May 12, 2025, EPA filed a declaration with the Court advising that the Agency intends to reconsider the PCE final rule through further rulemaking. In that declaration, the Agency expressed its intent to solicit early stakeholder input. EPA is now soliciting early stakeholder input regarding its intended reconsideration of the rule. EPA invites public comment on requirements and implementation of the PCE final rule (89 FR 103560), particularly on the topics described in Unit II. The information received in response to this notice will inform EPA's considerations of these provisions.

This review is being done in accordance with applicable law, Executive Orders, and Administration policies, including Executive Order 14219 “Ensuring Lawful Governance and Implementing the President's ‘Department of Government Efficiency’ Deregulatory Initiative” (90 FR 10583, February 19, 2025) and EPA's Powering the Great American Comeback Initiative Pillar I: Clean Air, Land, and Water for Every American.

D. What should I consider as I prepare my comments?

1. Submitting CBI

Do not submit CBI to EPA through <https://www.regulations.gov> or email. If you wish to include CBI in your comment, please follow the applicable instructions at <https://www.epa.gov/dockets/commenting-epa-dockets#rules> and clearly mark the information that you claim to be CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR parts 2 and 703, as applicable.

2. Tips for Preparing Your Comments

When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

II. Request for Comment

EPA invites public comment on all aspects of the PCE final rule, including but not limited to any existing or anticipated implementation issues associated with the final rule requirements, experiences with the PCE final rule since it went into effect, and whether the Agency should consider additional or alternative measures or

approaches to address the unreasonable risk presented by PCE under the conditions of use. Input on the following is of particular interest to EPA:

- The Existing Chemical Exposure Limit (ECEL) of 0.14 parts per million (ppm) as an 8-hour time weighted average (8-hr TWA) promulgated in the PCE final rule as part of the Workplace Chemical Protection Program (WCPP) (see 40 CFR 751.603 and 751.607(b)), including whether the use of a different exposure limit would be more appropriate to inform risk management. Different exposure limits might include but are not limited to: the acute non-cancer exposure limit of 0.50 ppm (8-hr TWA) and the lifetime cancer exposure limit of 0.47 ppm (8-hr TWA) as presented in the Existing Chemical Exposure Limit (ECEL) for Occupational Use of Perchloroethylene Memo available at <https://www.regulations.gov/document/EPA-HQ-OPPT-2020-0720-0043>.

- Conditions of use the Agency could contemplate subjecting to a WCPP as opposed to imposing a prohibition. Information such as workplace controls currently in place or other information demonstrating how regulated parties could mitigate the unreasonable risk of PCE for the condition of use would be most helpful to the Agency.

- The use of PCE in industrial dry cleaning processes including workplace controls that reduce exposure to PCE and the performance of alternatives to PCE in these operations.

To the extent possible, the Agency asks commenters to please cite and provide any public data related to or that supports comments provided, and to the extent permissible, describe and provide any supporting data that is not publicly available.

Authority: 15 U.S.C. 2605.

Dated: July 25, 2025.

Nancy B. Beck,

*Principal Deputy Assistant Administrator,
Office of Chemical Safety and Pollution Prevention.*
