Abstract: The New Source Performance Standards (NSPS) for Stationary Gas Turbines (40 CFR part 60, subpart GG) were proposed on October 3, 1977; promulgated on September 10, 1979; and last-amended on February 27, 2014. These regulations apply to existing facilities and new facilities that have stationary gas turbines with a heat input at peak load equal or greater than 10.7 gigajoules per hour (based on the lower heating value of the fuel fired). There are no new facilities under this subpart, as any facility which commenced construction, modification, or reconstruction after February 18, 2005 is subject to the NSPS for Stationary Combustion Turbines (40 CFR part 60, subpart KKKK).

Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 60, subpart A, as well as for the specific requirements at 40 CFR part 60, subpart GG. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of

the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities:

Stationary gas turbines.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart GG).

Estimated number of respondents: 535 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 69,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,000,000 (per year), includes \$0 for annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Director, Regulatory Support Division.

SUPPLEMENTARY INFORMATION:

Title: Pre-sale Availability of Written Warranty Terms (Pre-Sale Availability Rule or Rule), 16 CFR 702.

OMB Control Number: 3084-0112.

Type of Review: Extension of a currently approved collection.

Abstract: On December 31, 2019, the FTC sought public comment on the information collection requirements associated with the Rule. 84 FR 72362. No germane comments were received.¹ Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.*, the FTC is providing this second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for the Rule.

The Pre-sale Availability Rule, 16 CFR 702, is one of three rules² that the FTC issued as required by the Magnuson Moss Warranty Act, 15 U.S.C. 2301 *et seq.* (Warranty Act or Act).³ This Rule requires sellers and warrantors to make the text of any written warranty on a consumer product costing more than \$15 available to the consumer before sale. Among other things, the Rule requires sellers to make the text of the warranty readily available either by (1) displaying it in close proximity to the product or (2) furnishing it on request and posting signs in prominent locations advising consumers that the warranty is available. The Rule requires warrantors to provide materials to enable sellers to comply with the Rule's requirements and also sets out the methods by which warranty information can be made available before the sale if the product is sold through catalogs, mail order, or door to door sales. In addition, in 2016, the FTC revised the Rule to allow warrantors to post warranty terms on internet websites if they also provide a non-internet based method for consumers to obtain the warranty terms and satisfy certain other conditions. The revised Rule also allows certain sellers to display warranty terms pre-sale in an electronic format if the warrantor has used the online method of disseminating warranty terms.

Likely Respondents: Manufacturers and retailers of consumer products.

¹ The Commission received nine non-germane comments.

² The other two rules relate to the information that must appear in a written warranty on a consumer product costing more than \$15 if a warranty is offered and minimum standards for informal dispute settlement mechanisms that are incorporated into a written warranty.

³ 40 FR 60168 (Dec. 31, 1975).
