Proposed Project

Use of a Reader Response Form by Workers Notified if Results of Epidemiologic Studies—NEW—The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC). The mission of NIOSH is to promote safety and health at work for all people through research and prevention.

NIOSH routinely notifies subjects about the results of epidemiologic studies and the implications of the results. The overall purpose of the proposed project is to gain insight into the effectiveness of NIOSH worker notification, in order to improve the quality and usefulness of the Institute's worker notification activities. Researchers from the NIOSH Division of

Surveillance, Hazard Evaluations and Field Studies (DSHEFS) propose to provide notified workers with a Reader Response Form as an evaluation instrument for routinely assessing individual letter notification materials sent to them by NIOSH.

The results of this ongoing evaluation activity will be used to refine notification activities by standardizing and streamlining written notification materials, and to develop materials which are more readable, understandable, and informative to notified workers, their families, and other stakeholders. The findings from these evaluations may also allow the NIOSH worker notification program to help alleviate any negative impacts and enhance any positive impacts of risk communications.

The objective of the Reader Response Form, therefore, is to provide a structured reporting form which will capture the recipients' responses concerning the effectiveness of the NIOSH notification efforts and their impact on workers and other stakeholders.

The average number of letter-type notifications is estimated at 8,000 per year. Each form is estimated to take less than 10 minutes to complete. There are no cost to respondents other than their time to complete the Reader Response Form.

Respondents	No. of respondents	No. of responses/respondent	Avg. burden per response (in hours)	Total burden (in hours)
Reader Response Form	8000	1	10/60	1,333

Dated: January 29, 2002.

Acting Associate Director for Program, Planning and Evaluation, Centers for Disease Control and Prevention.
