SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Office of Minority Health Research Coordination Training and Mentor Programs Applications 0925-0748, REVISION, exp., date 8/31/2023 National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), National Institutes of Health (NIH).

Need and Use of Information Collection: In 2000, the National Institute of Diabetes and Digestive and Kidney Diseases of the National Institutes of Health established the Office of Minority Health Research Coordination to address the burden of diseases and disorders that disproportionately impact the health of minority populations. One of the major goals of the office is to build and sustain a pipeline of researchers from underrepresented populations in the biomedical, behavioral, clinical, and social sciences, with a focus on NIDDK mission areas. The office accomplishes this goal by administering a variety of programs and initiatives to recruit high

school through post-doctoral educational level individuals into OMHRC research training and mentor programs: The Short-Term Research Experience Program to Unlock Potential (STEP-UP), the Diversity Summer Research Training Program (DSRTP) for Undergraduate Students, and Network of Minority Health Research Investigators (NMRI), the NIH/National Medical Association (NMA) Academic Career Fellow Travel Awards, and the NIDDK/National Hispanic Medical Association (NHMA) Academic Career Fellow Travel Awards.

Identification of participants to matriculate into the program and initiatives comes from applications and related forms hosted through the NIDDK website. The proposed information collection activity is necessary in order to determine the eligibility and quality of potential awardees for traineeship in these programs.

OMB approval is requested for three (3) years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 1,651.
