k. *Description of Request:* The licensee proposes to conduct the Upper Baker Dam Spillway Stabilization and Tailrace Rock Debris Removal Project (spillway project) over a 12-week period, from April 1 through August 31, 2023. The proposed project is needed because: (1) the existing spillway slope has been identified as a potential failure mode for the Upper Baker Dam; and (2) rockfall debris in the tailrace channel downstream of the dam contributes to flooding of the powerhouse at the dam during flow spill events, which has reduced power generation. As required by Article 401(a) of the project license, and condition 5.10 of the Washington Department of Ecology's (Washington DOE) May 11, 2007 Water Quality Certificate (WQC), attached to the license as Appendix C, the licensee developed the Water Quality Protection Plan (Plan) for the spillway project, and has filed the Plan for the Commission's approval. The Plan addresses the requirements set forth in condition 5.10 of the WQC, and includes: (1) an In-Water Work Protection Plan that specifies the best management practices (BMPs) for activities that require work within surface waters; (2) a Construction Stormwater Pollution Prevention Plan that addresses land-disturbing activities along with BMPs and other control measures to prevent pollutants from entering the project's surface water and groundwater; and (3) procedures for monitoring water quality, and actions to implement if a water quality violation

were to occur. By email dated August 10, 2021, Washington DOE acknowledged receipt of and approved the Plan.

The licensee previously filed a draft Biological Assessment (BA) with the Commission on August 12, 2021 for the proposed spillway project. On July 14, 2022, the licensee filed a revised draft BA, and requested to withdraw the previously filed draft BA. On August 17, 2022, Commission staff adopted the licensee's July 14, 2022 draft BA without modification as the Commission's final BA and requested formal consultation with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis.
