SUPPLEMENTARY INFORMATION:

Abstract of patent application(s): An image processing system receives a digital image and analyzes the digital image to determine a resolution limit, referred to herein as “feature resolution,” for measuring a metric for features of the image within an acceptable margin of error. Specifically, the system segments a digital image and calculates the error associated with the segmented data when features within a certain range a measured metric (e.g., size range) are removed from the segmented data. This analysis can be repeatedly performed with different cutoff values for the metric until at least a threshold amount of error is reached, thereby indicating a resolution limit at the boundary of an acceptable amount of error.

Intellectual property: U.S. Application No. 17/671,527, filed on February 14, 2022, and entitled “*Systems and Methods for Determining Feature Resolution of Image Data.*”

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

Authority: 35 U.S.C. 209; 37 CFR part 404.

Tommy W. Lee,
Acting Air Force Federal Register Liaison Officer.

[Project No. 2411-030]

Eagle Creek Schoolfield, LLC, City of Danville; Notice of Intent To Prepare an Environmental Assessment

On July 29, 2022, Eagle Creek Schoolfield and the City of Danville filed a relicense application for the 4.5-megawatt Schoolfield Hydroelectric

Project No. 2411. The project is located on the Dan River in Pittsylvania County near the City of Danville, Virginia.

In accordance with the Commission’s regulations, on September 19, 2024, Commission staff issued a notice that the project was ready for environmental analysis (REA Notice). Based on the information in the record, including comments filed on the REA Notice, staff does not anticipate that licensing the project would constitute a major Federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an Environmental Assessment (EA) on the application to relicense the project.¹

The EA will be issued and circulated for review by all interested parties. All comments filed on the EA will be analyzed by staff and considered in the Commission’s final licensing decision.

The Commission’s Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

The application will be processed according to the following schedule. The EA will be issued for a 30-day comment period. Revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues EA.	December 2, 2025.

Any questions regarding this notice may be directed to Claire Rozdilski at (202) 502-8259 or claire.rozdilski@ferc.gov.

Dated: December 3, 2024.
