

particularly important for the Federal Government to prioritize for disaggregated data collection, analysis, and reporting?

b. How can existing Federal Government datasets be improved in terms of questions, survey structures, categories, collection methodology, data accessibility, and more in order to better serve community-based organizations and ensure that AA and NHPI population data is useful for further analysis?

c. What are some ideas on how the Federal Government can better partner with community-based organizations, think tanks, and academic institutions for secondary data analysis?

3. *Language Access Subcommittee Questions:*

a. Title VI of the Civil Rights Act of 1964 requires recipients of Federal financial assistance to provide meaningful access to their programs to people who are limited English proficient (LEP). How can the Federal Government ensure that recipients of Federal financial assistance conduct effective outreach to LEP communities, provide language access and support AAPI LEP communities, including those that speak languages of lesser diffusion? Examples, models, or promising practices are welcomed.

b. Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, requires the Federal Government to provide LEP individuals with meaningful access to federally-conducted programs and activities. Each Federal agency was also asked under Executive Order 13985, Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, to identify potential barriers that underserved communities and individuals may face to enrollment in and access to benefits and services in Federal programs. Given the Federal Government's commitment to language access and racial equity, how can the Federal Government better conduct outreach to and address the needs of AA and NHPI LEP communities, including those that speak languages of lesser diffusion? Examples, models, or promising practices are welcomed.

c. How can the Federal Government promote the preservation, teaching, learning of, maintenance and utilization of AA and NHPI languages?

4. *Immigration and Citizenship Status Subcommittee Questions:*

a. What information should the U.S. Department of Homeland Security's U.S. Citizenship and Immigration Services (USCIS) prioritize for translation, and

what Asian and Pacific Islander languages should be prioritized?

b. What are some ways for the U.S. Department of Homeland Security's U.S. Immigration and Customs Enforcement (ICE) to improve cultural sensitivity, equity, and language access in their interactions with the AAPI community?

c. How should the Federal Government improve access to humanitarian protections, such as asylum and victim protections for AAPI community members?

d. The citizens of the Freely Associated States of Palau, the Marshall Islands and the Federated States of Micronesia may live, study, and work in the United States and its territories without a visa. This arrangement is pursuant to compact treaties signed with these countries and in recognition of the special relationship they have with the United States. They are lawful residents and do not have immigrant status nor are they eligible to apply for permanent resident status. They are currently eligible for some Federal programs but not others. For example, they are eligible for the Women Infant and Children's Program (WIC), but not SNAP (Food Stamps). Please provide examples of the ways in which this lack of access to Federal benefits and programs has impacted citizens from the Freely Associated States?

e. Please provide input and recommendations on ways to reduce the burden on individuals and families subject to long-term orders of supervision following final orders of removal. Many Asian Americans and Pacific Islanders have final orders of removal and continue to live in the United States on orders of supervision. For example, some individuals have been required to check-in with U.S. Immigration and Customs Enforcement (ICE), sometimes yearly or more frequently, for over 20 years. Each ICE field office has the authority to decide the frequency of check-ins for an individual on an order of supervision, resulting in often burdensome and traumatic, non-uniform check-in schedules.

i. How do the current validity periods for Employment Authorization Documents (EAD) affect individuals with a long-term order of supervision? How would extending the validity period for EADs issued to this population impact their livelihood?

ii. What positive equities should ICE consider in determining removals and in the exercise of prosecutorial discretion?

Authority: Executive Order 14031. The President's Advisory Commission on Asian Americans, Native Hawaiians,

and Pacific Islanders (Commission) is governed by provisions of the Federal Advisory Committee Act (FACA), Public Law 92-463, as amended (5 U.S.C. App.), which sets forth standards for the formation and use of Federal advisory committees.

Krystal Ka'ai,

Executive Director, White House Initiative on Asian Americans, Native Hawaiians, and Pacific Islanders, President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders.
