B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2024–0152, in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not

want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB’s approval for the information collection summarized as follows.

1. *The title of the information collection:* Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-up Data on Events Involving the Use of Atomic Energy Act Radioactive Byproduct Material.

2. *OMB approval number:* 3150–0178.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Agreement States are requested to provide copies of licensee nuclear material event reports electronically or by hardcopy to the NRC within 30 days of receipt from their licensee. In addition, Agreement States are requested to report events that may pose a significant health and safety hazard to the NRC Headquarters Operations Officer within 24 hours of notification by an Agreement State licensee.

6. *Who will be required or asked to respond:* Current Agreement States and any State receiving Agreement State status in the future.

7. *The estimated number of annual responses:* 450.

8. *The estimated number of annual respondents:* 41.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 720 hours (360 reporting and 360 recordkeeping).

10. *Abstract:* NRC regulations require NRC licensees to report incidents and overexposures, leaking or contaminated

sealed source(s), release of excessive contamination of radioactive material, lost or stolen radioactive material, equipment failures, abandoned well logging sources and medical events. Agreement State licenses are also required to report these events to their individual Agreement State regulatory authorities under compatible Agreement State regulations. The NRC is requesting that the Agreement States provide information to the NRC on the initial notification, response actions, and follow-up investigations on events involving the use (including suspected theft or terrorist activities) of nuclear materials regulated pursuant to the Atomic Energy Act of 1954, as amended. The event information should be provided in a uniform electronic format, for assessment and identification of any facilities/site-specific or generic safety concerns that could have the potential to impact public health and safety. The identification and review of safety concerns may result in lessons learned and may also identify generic issues for further study which could result in proposals for changes or revisions to technical or regulatory designs, processes, standards, guidance or requirements.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.
2. Is the estimate of the burden of the information collection accurate? Please explain your answer.
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: April 23, 2025.

For the Nuclear Regulatory Commission.

Kristen Benney,

Acting NRC Clearance Officer, Office of the Chief Information Officer.

NUCLEAR REGULATORY COMMISSION

Docket No. 52-007

Constellation Energy Generation, LLC Clinton Early Site Permit

Exemption

I. Background

Exelon Generation Company, LLC, renamed Constellation Energy Generation, LLC (CEG or the permit holder), is the holder of early site permit (ESP) ESP-001. The ESP was issued for a site located approximately 6 miles east of the city of Clinton in central Illinois and adjacent to the existing Clinton nuclear power station. The ESP approves the site for one or more nuclear power plants, which may be modular and designed to operate collectively at no more than 6800 megawatts thermal, independent of a specific nuclear plant design or an application for a construction permit or combined license. The permit also provides, among other things, that the site is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, Commission) now or hereafter in effect. The Clinton ESP became effective on March 15, 2007, and expires on March 15, 2027.

II. Request/Action

By letter dated December 20, 2024 (Agencywide Documents Access and Management System Accession No. ML24355A121), CEG requested an exemption from 10 CFR 2.109, "Effect of timely renewal application," section (c), and 10 CFR 52.29, "Application for renewal," to allow the renewal application for ESP-001 to be submitted no later than 45 days prior to the expiration of the existing permit and still receive timely renewal protection under 10 CFR 2.109(c) and 10 CFR 52.29.

The regulation at 10 CFR 2.109(c) requires that the permit holder file a sufficient application for renewal no
