**Abstract:** Natural Gas STAR is a voluntary program sponsored by the U.S. Environmental Protection Agency (EPA) that encourages oil and natural gas companies to adopt cost effective technologies and practices that improve operational efficiency and reduce methane emissions. Methane is the primary component of natural gas and a potent greenhouse gas. The Program works with oil and natural gas companies in the production, gathering & processing, transmission, and distribution sectors to remove barriers that inhibit the implementation of technologies and practices that reduce methane emissions. The Program effectively promotes the adoption of emission reduction technologies and practices by helping Natural Gas Star partners evaluate Best Management Practices (BMPs) in the context of their current operations and implement them where cost effective. Implementation of the Program's BMPs saves participants money, improves operational efficiency, and enhances the protection of the environment.

The current Memorandum of Understanding used to join the Partnership has not been updated in 25 years. EPA proposes to replace it with a streamlined and more flexible Partnership Agreement which will more realistically reflect options companies have to engage with the Program. This change, in addition to updates to the annual report forms and increased flexibility regarding partner Implementation Plans, will reduce the total burden estimate for companies participating in Natural Gas STAR.

#### **Form Numbers:**

- Partnership Agreement: EPA Form No. 5900–105.
- Production Partners: EPA Form No. 5900–103.
- Transmission Partners: EPA Form No. 5900–109.
- Distribution Partners: EPA Form No. 5900–97.

- Gathering and Processing Partners: EPA Form No. 5900–100.
- Production Partners: EPA Form No. 5900–104.
- Transmission Partners: EPA Form No. 5900–95.
- Distribution Partners: EPA Form No. 5900–99.
- Gathering and Processing Partners: EPA Form No. 5900–102.

**Respondents/affected entities:** The gathering and processing, production, transmission, and distribution sectors of the oil and natural gas industry.

**Respondent's obligation to respond:** Voluntary.

**Estimated number of respondents:** 147 total (97 partners; 50 vendors).

**Frequency of response:** Annual for partners and semi-annual for vendor service directory.

**Total estimated burden:** 2,846 hours (per year). Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$268,577 (per year), includes \$0 annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is decrease of burden for Partner respondents from 6,995 hours in the ICR currently approved by OMB to 2,834 under this renewal request. This decrease is attributed to the Program's maturity and the fact that partner burden decreases over time as internal processes are established, a decrease in the number of companies joining Gas STAR, a decrease in the estimated number of partners submitting reports annually, and the streamlining of the Partnership Agreement and annual report forms. EPA estimates that approximately 50 companies will complete the Service Provider Directory form with a total burden of 13 hours annually.

**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 63, subpart L apply to all coke oven batteries, whether existing, new, reconstructed, rebuilt, or restarted. It also applies to all batteries using conventional by-product recovery processes, non-recovery processes, or any new recovery processes. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart L.

**Form Numbers:** None.

**Respondents/affected entities:** Coke oven batteries.

**Respondent's obligation to respond:** Mandatory (40 CFR part 63, subpart L).

**Estimated number of respondents:** 19 (total).

**Frequency of response:** Initially, occasionally, and semiannually.

**Total estimated burden:** 79,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$8,730,000 (per year), includes \$0 annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is an adjustment decrease in labor hours from the most recently approved ICR. This decrease reflects revisions to the number of existing respondents that are anticipated to reconstruct or close batteries subject to this standard; the burden reflected in this ICR assumes that reconstruction for one existing facility has been completed. This decrease is not due to any program changes.
