

Complex Orders. The Commission also notes that it previously approved the Enhanced Specialist Participation for the individual components of the Complex Order.⁴⁵ To receive an Enhanced Specialist Participation in the COLA, the specialist must satisfy the applicable requirements in current Phlx Rule 1014(g)(ii) to (iv).

The Commission also notes that Phlx Rule 1080(c)(ii)(C), relating to an Order Entry Firm's trading as principal with agency orders, will apply to Complex Orders and COLA Sweeps.⁴⁶

Finally, the Commission finds that the SPP is consistent with the Act. It is designed to protect market participants by preventing the automatic execution of certain Complex Order Strategies outside of a pre-set acceptable price range, which the Phlx will communicate to members by Exchange Circular.⁴⁷ The Phlx XL system will place orders that would execute outside of the acceptable price range on the CBOOK, rather than executing them automatically.⁴⁸

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,⁴⁹ that the proposed rule change (SR-Phlx-2008-50) is approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁰

Florence E. Harmon,

Acting Secretary.

DEPARTMENT OF STATE

[Public Notice 6326]

Notice of Availability of the Final Environmental Assessment and A Finding of No Significant Impact for the Proposed PMI Frontera Juarez Pipeline Project

August 15, 2008.

AGENCY: Department of State.

ACTION: Notice of Availability of the Final Environmental Assessment and A Finding of No Significant Impact for the Proposed PMI Frontera Juarez Pipeline Project.

SUMMARY: This notice announces the availability of the Final Environmental Assessment and a Finding of No Significant Impact for the Proposed PMI Frontera Juarez Pipeline Project.

On January 18, 2008, PMI Services North America ("PMI") applied for a Presidential permit to construct, connect, operate and maintain a 10.75-inch liquid hydrocarbon (gasoline and diesel) pipeline for the transportation of liquid hydrocarbon products between the United States and Mexico, to be located at the international border between the United States and Mexico, near San Elizario, Texas. Currently, the refined products are transported across the international border via trucks from El Paso to Ciudad Juarez. The Frontera Juárez Pipeline would displace this mode of delivery with the proposed net effect of increasing safety and decreasing the negative impact to the local environment.

Executive Order 13337 of April 30, 2004, as amended, delegates to the Secretary of State the President's authority to receive applications for permits for the construction, connection, operation, or maintenance of facilities, including pipelines, for the exportation or importation of petroleum, petroleum products, coal, or other fuels at the border of the United States and to issue or deny such Presidential Permits upon a national interest determination. The Executive Order directs the Secretary of State to refer the application and pertinent information to, and to request the views of, the heads of certain agencies before issuing a Permit and authorizes the Secretary to consult with other interested federal and state officials, as appropriate. The
