

noncleared swaps (as a substitute for compliance with the prudential regulators' rule) if the prudential regulators jointly determine that the foreign regulatory framework is comparable to the requirements in the prudential regulators' rule. Section 349.9(e) allows a covered swap entity to request that the prudential regulators make a substituted compliance determination and must provide the reasons therefore and other required supporting documentation. A request for a substituted compliance determination must include: (1) A description of the scope and objectives of the foreign regulatory framework for non-cleared swaps and non-cleared security-based swaps; (2) the specific provisions of the foreign regulatory framework for non-cleared swaps and security-based swaps (scope of transactions covered; determination of the amount of initial and variation margin required; timing of margin requirements; documentation requirements; forms of eligible collateral; segregation and rehypothecation requirements; and approval process and standards for models); (3) the supervisory compliance program and enforcement authority exercised by a foreign financial regulatory authority or authorities in such system to support its oversight of the application of the non-cleared swap and security-based swap regulatory framework; and (4) any other descriptions and documentation that the prudential regulators determine are appropriate. A covered swap entity may make a request under this section only if directly supervised by the authorities administering the foreign regulatory framework for non-cleared swaps and non-cleared security-based swaps. Section 349.10 requires a covered swap entity to execute trading documentation with each counterparty that is either a swap entity or financial end user regarding credit support arrangements that: (1) Provides the contractual right to collect and post initial margin and variation margin in such amounts, in such form, and under such circumstances as are required and (2) specifies the methods, procedures, rules, and inputs for determining the value of each non-cleared swap or noncleared security-based swap for purposes of calculating variation margin requirements and the procedures for resolving any disputes concerning valuation. Section 349.11(b)(1) provides that the requirement for a covered swap

entity to post initial margin under § 349.3(b) does not apply with respect to any noncleared swap or non-cleared security based swap with a counterparty that is an affiliate. A covered swap entity shall calculate the amount of initial margin that would be required to be posted to an affiliate that is a financial end user with material swaps exposure pursuant to § 349.3(b) and provide documentation of such amount to each affiliate on a daily basis.

There is no change in the method or substance of the collection. The FDIC currently does not supervise any institutions that are subject to this information collection but is reporting one respondent as a placeholder to preserve the burden estimates. For clarity, the burden presentation has been changed to correspond to the burden presentation made by the other agencies in their respective information collections. There is no change in the total estimated annual burden.

#### Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Federal Deposit Insurance Corporation.
