ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Safeguards conform to the HHS Information Security and Privacy Program, <https://www.hhs.gov/ocio/securityprivacy/index.html>. The information technology system used to store the records leverages cloud service providers that maintain an authority to operate in accordance with applicable laws, rules, and policies, including Federal Risk and Authorization Management Program (FedRamp) requirements.

Information is safeguarded in accordance with applicable laws, rules and policies, including the HHS information security policies, the E-Government Act of 2002, which includes the Federal Information Security Management Act of 2002 (FISMA), 44 U.S.C. 3541 through 3549, as amended by the Federal Information Security Modernization Act of 2014, 44 U.S.C. 3551 through 3558, all pertinent National Institutes of Standards and Technology (NIST) publications, and OMB Circular A-130, Managing Information as a Strategic Resource. Records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. Agency personnel, contractors, and grantees who have access to the records are required to maintain confidentiality by assuring that case records are kept in a safe, secure environment within agency, contractor, or grantee facilities. They are also required to sign a confidentiality agreement and to receive annual training on records management, cybersecurity, privacy, and confidentiality policies and procedures, including methods of protecting client confidentiality.

Case records are filed electronically according to OFA protocols, and access to records is controlled through log-in/out processes for computer logs. The records are accessible only to authorized users using two-factor authentication through a secured system that is protected by encryption, firewalls, and intrusion detection systems and requires additional encryption for any records stored on removable media. Records that become eligible for destruction are disposed of in alignment with the secure destruction methods prescribed by the NIST Special Publication (SP) 800-88. The associated information

technology (IT) system(s) receive Authority to Operate (ATO) under the guidance of NIST SP 800-53.
