

Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555; to the Director, Office of Enforcement at the same address; to the Assistant General Counsel for Materials Litigation and Enforcement at the same address, to the Regional Administrator for NRC Region I at 475 Allendale Road, King of Prussia, PA 19406; and to the licensee if the answer or hearing request is by a person other than the licensee. Because of potential disruptions in delivery of mail to United States Government offices, it is requested that answers and requests for hearing be transmitted to the Secretary of the Commission, either by means of facsimile transmission to 301-415-1101, or by e-mail to hearingdocket@nrc.gov and also to the Office of the General Counsel, either by means of facsimile transmission to 301-415-3725, or by e-mail to OGCMailCenter@nrc.gov. If a person other than PSEG requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is requested by PSEG or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such a hearing shall be whether this Order should be sustained.

Pursuant to 10 CFR 2.202(c)(2)(I), PSEG may, in addition to demanding a hearing, at the time the answer is filed or sooner, move the presiding officer to set aside the immediate effectiveness of the Order on the grounds that the Order, including the need for immediate effectiveness, is not based on adequate evidence but on mere suspicion, unfounded allegations, or error.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section III above shall be final twenty (20) days from the date of this Order without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section III shall be final when the extension expires if a hearing request has not been received. An answer or a request for hearing shall not stay the immediate effectiveness of this Order.

Dated this 5th day of May, 2005.

For the Nuclear Regulatory Commission.

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The U.S. Nuclear Regulatory Commission (NRC) has issued for public comment a draft revision to an existing guide in the agency's Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft Revision 1 of Regulatory Guide 3.71, entitled "Nuclear Criticality Safety Standards for Fuels and Material Facilities," is temporarily identified by its task number, DG-3023, which should be mentioned in all related correspondence. Like its predecessor, the proposed revision describes methods that the NRC staff finds acceptable for complying with the NRC's regulations in Title 10, parts 70 and 76, of the Code of Federal Regulations (10 CFR parts 70 and 76).

In 10 CFR Part 70, "Domestic Licensing of Special Nuclear Material," Section 70.20, "General License To Own Special Nuclear Material," defines a specific license to acquire, deliver, receive, possess, use, transfer, import, or export special nuclear material. According to 10 CFR 70.22, "Contents of Applications," each application for such a license must contain proposed procedures to avoid nuclear criticality accidents. In 10 CFR Part 76, "Certification of Gaseous Diffusion

Plants," Section 76.87, "Technical Safety Requirements," states that the technical safety requirements should reference procedures and equipment that are applicable to criticality prevention.

The NRC initially issued Regulatory Guide 3.71 in 1998 to provide guidance concerning procedures that the staff considered acceptable for complying with these portions of the NRC's regulations. Toward that end, the original guide endorsed specific nuclear criticality safety standards developed by the American Nuclear Society's Standards Subcommittee 8 (ANS-8), "Operations with Fissionable Materials Outside Reactors." Those national standards provide guidance, criteria, and best practices for use in preventing and mitigating criticality accidents during operations that involve handling, processing, storing, and/or transporting special nuclear material at fuel and material facilities. The original guide also took exceptions to certain portions of individual ANS-8 standards. In addition, the original guide consolidated and replaced a number of earlier NRC regulatory guides, thereby providing all of the relevant guidance in a single document.

Since that time, several ANS-8 nuclear criticality safety standards have been added, reaffirmed, revised, or withdrawn. Consequently, the NRC staff has decided to update this guide to clarify which standards the agency endorses and to clearly state exceptions to individual standards. This proposed revision does not change any of the guidance provided in Regulatory Guide 3.71; rather, it provides guidance concerning changes that have occurred since the NRC published the original guide in 1998.

The NRC staff is soliciting comments on Draft Regulatory Guide DG-3023. Comments may be accompanied by relevant information or supporting data. Please mention DG-3023 in the subject line of your comments.
