

396 acres of brush field would be burned and 5,540 acres would be thinned. Thinning would include:

- Thin from below: 3,610 acres,
- Hand thin to 10 inch diameter at breast height (dbh): 92 acres,
- Shaded fuel break: 1,707 acres of thin from below in a shaded fuel break,
- Shaded fuel break—thin to 8 inch dbh: 135 acres within perennial riparian reserves that intersect fuel breaks, but outside of the equipment exclusion zone,
- Plantation pre-commercial thin: 88 acres.

Sub-merchantable fuel would be reduced in all treatment units to desirable levels of between 5 and 10 tons of downed material per acre depending on the Forest Plan land allocation for the area.

Approximately 6.7 miles of new temporary roads would be needed to access units. Approximately 65.6 miles of system roads will require pre-haul maintenance, such as blading. Approximately 13.5 miles of system roads will require more earthwork and sight distance clearing before they can be safely used as haul roads. Approximately 2.4 miles of unclassified routes, would require brushing and re-shaping for use with this project, and then decommissioned after use. Approximately 21 miles of system road and 7 miles of unclassified routes would be decommissioned after use for this project. Treatments are expected to produce 33 million board feet (mmbf) of potentially merchantable saw timber and 35,092 tons of biomass.

#### Responsible Official

J. Sharon Heywood, Forest Supervisor, Shasta-Trinity National Forest.

#### Nature of Decision To Be Made

The Forest Supervisor will decide whether to implement the proposed action, take an alternative action that meets the purpose and need, or take no action.

#### Scoping Process—Public Comment

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. The project will be included in the Shasta-Trinity National Forest's quarterly schedule of proposed actions (SOPA). Information on the proposed action will also be posted on the forest Web site (<http://www.fs.fed.us/r5/shastatrinity/projects>) and advertised in the Record Searchlight—a local newspaper.

It is important that reviewers provide their comments at such times and in

such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. The submission of timely and specific comments can affect a reviewer's ability to participate in subsequent administrative appeal or judicial review.
