

to create grade standards for frozen celery that will include a description of the product, style, sample unit size, grades, ascertaining the grade by sample, and ascertaining the grade by lot. The standard is intended to provide a common language for trade, and a means of measuring value in the marketing of frozen celery.

EFFECTIVE DATE: January 9, 2004.

FOR FURTHER INFORMATION CONTACT:

Karen L. Kaufman, Processed Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, STOP 0247, 1400 Independence Avenue SW., Washington, DC 20250-0247; fax (202) 690-1087; or e-mail karen.kaufman@usda.gov.

SUPPLEMENTARY INFORMATION: Section 203(c) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), as amended, directs and authorizes the Secretary of Agriculture "to develop and improve standards of quality, condition, quantity, grade, and packaging, and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices * * *." AMS is committed to carrying out this authority in a manner that facilitates the marketing of agricultural commodities and makes copies of official standards available upon request. The United States Standards for Grades of Fruits and Vegetables are maintained by USDA/AMS/Fruit and Vegetable Programs and may be obtained by writing to the above address or on the internet at: <http://www.ams.usda.gov/standards/standpfv.htm>.

AMS is establishing the U.S. Standards for Grades of Frozen Celery using the procedures that appear in part 36 of title 7 of the Code of Federal Regulations (7 CFR part 36).

Proposed by the Petitioner

The petitioner, a grower and a processor of celery, requested that USDA develop a standard for frozen celery to be used by the industry. The petitioner provided information on style, sample size and description to AMS to develop the standard. AMS visited the petitioner's facility to collect information on grades of frozen celery and how to ascertain the grade of a sample and of a lot.

AMS prepared a discussion draft of the frozen celery standard, and distributed copies for input to the petitioner, the American Frozen Food Institute (AFFI), and the National Food Processors Association (NFPA). Input from the above groups was used to develop the standard.

Proposed by Fruit and Vegetable Programs, AMS

The first notice proposing to create a new United States Standards for Grades of Frozen Celery was published based on the petition in the May 2, 2001 **Federal Register**. A second notice was published in the February 20, 2003 **Federal Register** (68 FR 8196) based on comments received from the first notice. AMS received three comments in response to the second notice. All of the responses were in favor of the new standard. These comments are available by accessing AMS's Home Page on the Internet at: <http://www.ams.usda.gov/fv/ppb.html>.

Based on recommendations from the commentators the following changes were made to the standard, add "Bias sliced celery" to Section 2.6681. Styles of frozen celery. (a) Sliced celery; changes to Table I—Allowances for Defects in Frozen Celery include the addition of "bias sliced" celery with "sliced" style; for blemished and seriously blemished units no unit larger than a 1/4", for insect damage no larger than 1/8"; for grades of "sliced", "bias" and "diced" style: blemished Grade "A" maximum of 3% by weight, Grade "B" maximum of 4% by weight, seriously blemished Grade "A" maximum of 1% by weight, Grade "B" maximum of 2% by weight, for mechanical damage, crushed or broken units for Grade "B" no more than 3% by weight and "sliced" and "bias" style extraneous vegetable material allowed in Grade "A" one piece, and Grade "B" two pieces.

Accordingly, AMS is establishing the United States Standard for Grades of Frozen Celery. The U.S. Standards for Grades of Frozen Celery following the standard format for U.S. Grade Standards. AMS is establishing the definition of "frozen celery" and including "sliced", "bias" and "diced" as the style designations in the standard. Finally, this standard defines the quality factors that affect frozen celery and determine sample unit sizes for this commodity.

This standard establishes the grade levels "A", "B" and "Substandard" and assigns the corresponding score points for each level. The tolerance for each quality factor as defined for each grade level is established.

The grade of a sample unit of frozen celery will be ascertained by considering the factors of varietal characteristics flavor and odor, which are not scored; the ratings for the factors of color, defects, and character, which are scored; the total score; and the limiting rules which apply. This standard will provide a common

language for trade, a means of measuring value in the marketing of frozen celery, and provide guidance in the effective utilization of frozen celery. The official grade of a lot of frozen celery covered by these standards will be determined by the procedures set forth in the Regulations Governing Inspection and Certification of Processed Products Thereof, and Certain Other Processed Food Products (§ 52.1 to 52.83).

The U.S. Standards for Grades of Frozen Celery will become effective 30 days after publication of this notice in the **Federal Register**.

Authority: 7 U.S.C. 1621-1627.

Dated: December 4, 2003.

[Docket Number FV-04-301]

United States Standards for Grades of Greenhouse Tomatoes

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: The Agricultural Marketing Service (AMS), prior to undertaking research and other work associated with revising official grade standards, is soliciting comments on the petition to revise the United States Standards for Grades of Greenhouse Tomatoes. At a recent meeting of the Fruit and Vegetable Industry Advisory Committee, AMS was asked to review all fresh fruit and vegetable grade standards for usefulness in serving the industry. As a result, AMS has noted that the method for determining percentages of defects and size classifications for greenhouse tomatoes needs to be revised to stay in line with current marketing practices. Additionally, AMS is seeking comments regarding any other revisions that may be necessary to better serve the industry.

DATES: Comments must be received by February 9, 2004.

ADDRESSES: Interested persons are invited to submit written comments to the Standardization Section, Fresh Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Ave., SW., Room 1661, South Building, Stop 0240, Washington, DC 20250-0240; fax (202)

720-8871, e-mail FPB.DocketClerk@usda.gov. Comments should make reference to the dates and page number of this issue of the **Federal Register** and will be made available for public inspection in the above office during regular business hours.

FOR FURTHER INFORMATION CONTACT:

David L. Priester, at the above address, or call (202) 720-2185; e-mail David.Priester@usda.gov.

SUPPLEMENTARY INFORMATION: At a recent meeting of the Fruit and Vegetable Industry Advisory Committee, AMS was asked to review all fresh fruit and vegetable grade standards for usefulness in serving the industry. AMS has identified the United States Standards for Grades of Greenhouse Tomatoes for possible revision. These standards were last revised in 1966. Since that time, marketing and packaging practices have changed. The current standards state that the size of greenhouse tomatoes and the percentage of defects shall be determined by weight. Currently however, greenhouse tomatoes are packed and marketed in a variety of methods, typically based on size or count. Prior to undertaking detailed work to develop the proposed revised standards, AMS is soliciting comments on the possible revision of the standards for grades of greenhouse tomatoes and the probable impact on distributors, processors, and growers.

This notice provides for a 60-day comment period for interested parties to comment on changes to the standards. Should AMS proceed with revising the standards, the proposed revision of the standards will be published in the **Federal Register** with a request for comments in accordance with 7 CFR part 36.

Authority: 7 U.S.C. 1621-1627.

Dated: December 4, 2003.

A.J. Yates,

Administrator, Agricultural Marketing Service.

United States Standards for Grades of Sweet Potatoes

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: The Agricultural Marketing Service (AMS), prior to undertaking

research and other work associated with revising an official grade standard, is soliciting comments on a possible revision to the United States Standards for Grades of Sweet Potatoes. At a recent meeting of the Fruit and Vegetable Industry Advisory Committee, AMS was asked to review all the fresh fruit and vegetable grade standards for usefulness in serving the industry. As a result, AMS has noted that the size requirements for sweet potatoes are complex and may be difficult to apply. Therefore, AMS is soliciting comments on the possible revision of the size requirements. Additionally, AMS is seeking comments regarding any other revisions that may be necessary to better serve the industry.

DATES: Comments must be received by February 9, 2004.

ADDRESSES: Interested persons are invited to submit written comments to the Standardization Section, Fresh Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Ave., SW., Room 1661 South Building, Stop 0240, Washington, DC 20250-0240; Fax (202) 720-8871, E-mail FPB.DocketClerk@usda.gov.

Comments should make reference to the dates and page number of this issue of the **Federal Register** and will be made available for public inspection in the above office during regular business hours.

SUPPLEMENTARY INFORMATION:

Background

At a recent meeting of the Fruit and Vegetable Industry Committee, AMS was asked to review all the fresh fruit and vegetable grade standards for usefulness in serving the industry. AMS has identified the United States Standards for Grades of Sweet Potatoes for a possible revision. These standards were last revised in 1963. As a result, AMS identified the size requirements of the U.S. Extra No. 1 grade and the U.S. No. 1 grade for possible revision. Currently the U.S. Extra No. 1 grade requires that the length of a sweet potato be not less than 3 inches or more than 9 inches, the maximum diameter not to exceed 3 1/4 inches, the maximum weight not to exceed 18 ounces and unless otherwise specified, the minimum diameter not be less than 1 3/4 inches. The U.S. No. 1 grade requires the maximum diameter of a sweet potato not to exceed 3 1/2 inches, the maximum

weight not to exceed 20 ounces, the length be not less than 3 inches or more than 9 inches unless otherwise specified, and the minimum diameter not be less than 1 3/4 inches unless otherwise specified. These requirements are complex and may be difficult to apply. While these requirements may have reflected sweet potatoes sizes marketed in the past, but they need to be updated to reflect the marketing of sweet potatoes today. Therefore, AMS believes that a change to these requirements is warranted to better serve the industry. However, prior to undertaking detailed work to develop a proposed revision to the standard, AMS is soliciting comments on the possible revision to the standard and the probable impact on distributors, processors, and growers. Additionally, AMS is seeking comments regarding any other revisions that may be necessary to better serve the industry.

This notice provides for a 60-day comment period for interested parties to comment on changes to the standard. Should AMS proceed with revising the standard, the proposed revision of the standard will be published in the **Federal Register** with a request for comments in accordance with 7 CFR part 36.

Authority: 7 U.S.C. 1621-1627.
