SUPPLEMENTARY INFORMATION:

Title: Movement of Organisms Modified or Produced Through Genetic Engineering.

OMB Control Number: 0579-0085.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement in interstate commerce of any plant, plant product, biological control organism, noxious weed, article, or means of conveyance, if the Secretary determines that the prohibition or restriction is necessary to prevent the introduction or the dissemination of a plant pest into the United States.

Under this authority, the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS) has established regulations in 7 CFR part 340, "Movement of Organisms Modified or Produced Through Genetic Engineering," that govern the movement (importation, interstate movement, or release into the environment) of covered organisms modified or produced through genetic engineering. A permit must be obtained before an organism subject to the regulations may be moved. The regulations set forth the permit application requirements for the movement of an organism subject to the regulations and necessitate certain information collection activities, such as confirmation of exemption requests; regulatory status reviews; applications and procedures for certain APHIS-issued permits and associated State and Tribal reviews; permit appeals; marking or labeling of containers; and maintaining records.

Several activities previously reported under this information collection, Office of Management and Budget (OMB) control number 0579-0085, are being discontinued or replaced with those now listed above. This change in activities is based on a final rule that APHIS published in the *Federal*
