

surface) estate. The BLM State Director is the Authorized Officer for the BLM, and will decide whether or not to modify the existing coal lease under the Mineral Leasing Act, as amended, and the federal regulations under 43 CFR 3400. The Uncompahgre Field Office Manager/Southwest District Manager is responsible for providing the State Director with briefings and recommendations. Specifically, the BLM will decide whether to:

- Adopt the No-Action Alternative (no leasing);
- Adopt the coal lease modifications as applied for by the applicants;

BLM cannot issue lease modifications without the consent of the surface managing agency. BLM's must also decide whether to approve the exploration plan and allow the activities to occur on the coal leases, consistent with lease rights if granted, in the manner described in the plan, disapprove the plan with a statement of conformity, or approve the plan with additional conditions (43 CFR 3482.2(a)(1)), if needed to minimize impacts. BLM cannot approve an exploration plan without concurrence by the surface management agency (concurrence is not a "decision" subject to Forest Service objection process).

OSM

Office of Surface Mining Reclamation Enforcement (OSM) is a cooperating agency in preparing this EIS. If the leases are modified, OSM will determine if there is a need for a federal mining plan modification at the time the actual permitting process is underway. If a federal mining plan modification is needed, OSM would be responsible to recommend that the DOI Assistant Secretary for Lands and Minerals approve, approve with conditions, or not approve the modification.

DRMS

In Colorado, the Division of Reclamation Mining and Safety (DRMS) operates under an OSM-approved program for administering coal mining operations in the state, as codified by the Colorado Surface Coal Mining Reclamation Act (CRS 34–33–101) and attendant regulations which are consistent with the overarching federal regulations (30 CFR part 906, Appendix B). Any applications submitted to the State of Colorado to revise the state mining and reclamation permit, including applications to allow mining and its related surface disturbances, reclamation, and the changing of the approved mine permit boundary to include the modification area, would be reviewed by the DRMS.

Preliminary Issues

Issues have previously been addressed in the Final EIS (Table 1.9) and will be carried forward in this analysis. It is believed that new issues will arise during this the Supplemental EIS process including, but not limited to: Changes in fish recovery status prompting reconsideration of GMUG's Programmatic Biological Opinion for Water Depletions related to Endangered Big River Fishes and request for Social Cost of Methane analysis.

Scoping Process

In addition to receiving and considering previous comments from the public, the agency continues to accept and consider public comments to guide the development of this Supplemental EIS and the resulting decision. Additional comments should clearly articulate the reviewer's concerns and contentions, and focus on the adequacy of stipulations proposed as they relate to the protection of surface resources or specific to analysis that must be undertaken relative to exploration activities. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.
