

Community-Level Data Collection

The Community-level Instrument (CLI) is a two part, web-based survey for capturing information about SPF SIG implementation at the community level. Data from this instrument allows CSAP to assess the progress of the communities in their implementation of both the SPF and prevention-related interventions funded under the initiative. Part I of the instrument gathers information on the communities' progress implementing the five SPF SIG steps and efforts taken to ensure cultural competency throughout the SPF SIG process. Subrecipient communities receiving SPF SIG awards will be required to complete Part I of the instrument annually.

Part II captures data on the specific prevention intervention(s) implemented

at the community level, and is completed for each prevention intervention strategy implemented during the specified reporting period. Specific questions are tailored to match the type of prevention intervention strategy implemented (e.g., Prevention Education, Community-based Processes, and Environmental). Information collected on each strategy will include date of implementation, numbers of groups and participants served, frequency of activities, and gender, age, race, and ethnicity of population served/affected. Subrecipient communities' partners receiving SPF SIG awards are required to update Part II of the instrument a minimum of every six months.

The estimated annual burden for specific segments of the community-level data collection is displayed in

Table 1. The total burden assumes an average of 15 community-level subrecipients per grantee, annual completion of the CLI Part I, a minimum of two instrument updates per year for the CLI Part II, and an average of three distinct prevention intervention strategies implemented by each community during a 6-month period.

Total Estimates of Annualized Hour Burden

Estimates of total and annualized reporting burden for respondents by evaluation cohort are displayed below in Table 1. CSAP is requesting an average annual estimate of: 167.28 hours at the grantee-level and 5,737.5 hours at the community-level. These hours are a reduction in the average annual estimate requested in the previous submission for grantees and communities.
