

As a result of the decommissioning, the FAA was required to redefine the airspace that uses the VOR as a reference and remove the reference from the associated airspace descriptions. The U.S. Air Force requested elimination of airspace previously excluded for operations at Spanaway Airport. In response, the FAA completed an airspace review to evaluate that request and the Class D airspace had not been examined in the previous two years as required by FAA Orders.

The exclusion of Class D airspace that is southeast of the airport would be modified to facilitate use of the airspace for aircraft arriving and departing Shady Acres Airport, in keeping with FAA Directives. A portion of the airspace overlying Lakewood, WA would also be eliminated, as it is no longer needed.

In addition, the Legal Descriptions Heading would be corrected to identify the proper city and state, the name of the airport and the geographical coordinates for McChord Field (Joint Base Lewis McChord) to match the FAA's National Airspace System Resource (NASR) database.

Class D airspace designations are published in paragraph 5000 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated

impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
