DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CD19-3-000]

Upcountry LLC; Notice of Preliminary Determination of a Qualifying Conduit Hydropower Facility and Soliciting Comments and Motions To Intervene

On December 20, 2018, the Upcountry LLC filed a notice of intent to construct

a qualifying conduit hydropower facility, pursuant to section 30 of the Federal Power Act (FPA), as amended by section 4 of the Hydropower Regulatory Efficiency Act of 2013 (HREA). The proposed Mill Pressure Reducing Device Project would have a total installed capacity up to 72 kilowatts (kW), and would be located on the existing raw water supply pipeline. The project would be located near the City of Portland in Hood River County, Oregon.

Applicant Contact: Jonathon Munk, Upcountry LLC, 1675 Country Club Road, Hood River, OR 97031, Phone No (503) 460-7220, email: jonmunk4@gmail.com.

FERC Contact: Robert Bell, Phone No. (202) 502-6062; Email: robert.bell@ferc.gov.

Qualifying Conduit Hydropower Facility Description: The proposed project would consist of: (1) A 72-kW turbine-generator connected to an existing raw water supply pipeline and (2) appurtenant facilities. The proposed project would have an estimated annual generation of up to 630 megawatt-hours.

A qualifying conduit hydropower facility is one that is determined or deemed to meet all of the criteria shown in the table below.

TABLE 1—CRITERIA FOR QUALIFYING CONDUIT HYDROPOWER FACILITY

Statutory provision	Description	Satisfies (Y/N)
FPA 30(a)(3)(A), as amended by HREA ..	The conduit the facility uses is a tunnel, canal, pipeline, aqueduct, flume, ditch, or similar manmade water conveyance that is operated for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity.	Y
FPA 30(a)(3)(C)(i), as amended by HREA	The facility is constructed, operated, or maintained for the generation of electric power and uses for such generation only the hydroelectric potential of a non-federally owned conduit.	Y
FPA 30(a)(3)(C)(ii), as amended by HREA.	The facility has an installed capacity that does not exceed 5 megawatts	Y
FPA 30(a)(3)(C)(iii), as amended by HREA.	On or before August 9, 2013, the facility is not licensed, or exempted from the licensing requirements of Part I of the FPA.	Y

Preliminary Determination: The proposed Mill Pressure Reducing Device Project will not interfere with the primary purpose of the conduit, which is to transport water for irrigation by filling an equalizing reservoir, which in

turn provides pressure for an irrigation zone in its service area. Therefore, based upon the above criteria, Commission staff preliminarily determines that the proposal satisfies the requirements for a qualifying conduit hydropower facility,

which is not required to be licensed or exempted from licensing.

Comments and Motions To Intervene: Deadline for filing comments contesting whether the facility meets the qualifying
