### National Oceanic and Atmospheric Administration

#### **Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Greater Atlantic Region Atlantic Sea Scallop Fishery Management Plan**

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the *Federal Register* on October 10, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Decision Memorandum. See *Carbon and Alloy Steel Threaded Rod from India and the People's Republic of China: Final Results of the Expedited First Sunset Review of the Countervailing Duty Orders*, 90 FR 11708 (March 11, 2025), and accompanying Issues and Decision Memorandum at 14.

*Agency:* National Oceanic and Atmospheric Administration (NOAA), Commerce.

*Title:* Greater Atlantic Region, Atlantic Sea Scallop Fishery Management Plan.

*OMB Control Number:* 0648-0491.

*Form Number(s):* None.

*Type of Request:* Regular (extension of current information collection).

*Number of Respondents:* 804.

*Average Hours per Response:* Trip exchange request (full & part-time)—15 minutes; Quota transfer application (temporary & permanent)—5 minutes; Cost Recovery—2 hours; Sector Proposals & Operation Plans—250 hours.

*Total Annual Burden Hours:* 980 hours.

*Needs and Uses:* This is a request for renewal of an approved information collection. Under the Magnuson-Stevens Fishery Conservation and Management Act, the Secretary of Commerce has the responsibility for the conservation and management of marine fishery resources. Much of this responsibility has been delegated to NOAA's National Marine Fisheries Service (NMFS).

NMFS manages the Atlantic Sea Scallop (scallop) fishery through a set of regulations that limit catch of scallops and fishing vessel activity. In addition, regulations limit catch of certain other species of fish in order to minimize bycatch and discard mortality (bycatch is the catch and discard of species that are not targeted in the scallop fishery). Finally, the regulations control vessel permitting and the exchange of effort and quota allocations between vessels. In order to effectively manage these resources, track fishing effort and catch, and to allow vessel owners to exchange fishing trips and quota, NMFS must collect information through the reporting requirements included in this renewal. This renewal contains the following information collections: Access area trip exchange application procedures; Individual Fishing Quota (IFQ) transfers; Cost recovery; and IFQ sector program.

#### **Access Area Trip Exchange Application**

The one-for-one access area trip exchange program provides flexibility to scallop vessels about where they may fish. Participants need to send an access area trip exchange application to NMFS with the following information: Vessel name and permit number, owner name and signature, specification of the areas involved in the exchange. Both vessels involved in the exchange are required to submit forms for cross verification. This measure provides flexibility to vessels regarding which areas to fish, thereby
