

preempts state law, or otherwise has Federalism implications.

This rule announces the provisions of section 6053(b) of the Deficit Reduction Act of 2005. We do not estimate this regulation will have any significant effect on the economy. Nevertheless, we estimate the impact of the provision, once implemented, to be minimal. Our analysis suggests that the modification to the FMAPs will only affect Texas. The effect will likely be a minimal decrease in State Medicaid and SCHIP spending and a corresponding minimal increase in federal Medicaid and SCHIP spending.

In addition, the provisions only directly affect states. Therefore, there is no need to perform a regulatory flexibility analysis in accordance with section 603 of the Regulatory Flexibility Act.

H. Summary

We propose to adjust the fiscal year 2008 FMAP rate only for the State of Texas, by reducing the income estimates used in the FMAP calculation through the application of adjustments to reflect interstate population dispersal income and FEMA disaster assistance income for evacuees. Because this is the only income that can be attributed to Katrina evacuees based on BEA data, this income will be subtracted from the 2005 state personal income as published by BEA in October 2006 to obtain a new state personal income for Texas. This state personal income will be divided by the state population as of July 2005 to get a revised per capita personal income for each state. This revised 2005 per capita personal income will replace the 2005 per capita personal income in calculating the 2008 FMAPs.

Effective Dates: The percentages listed will be effective for each of the four (4) quarter-year periods in the period beginning October 1, 2007 and ending September 30, 2008.
