

This proposed program would restrict its focus on Alaska pinnipeds under the statutory jurisdiction of NMFS (seals and sea lions); proposals focusing on marine mammals under the jurisdiction of the U.S. Fish and Wildlife Service would not be eligible.

The objectives of a potential Alaska Pinniped Research Program would include: 1) Supporting effective conservation and management of seals, sea lions, and Northern fur seals in waters off Alaska; and 2) Implementing high-priority research objectives or address species conservation priorities specified in a NMFS recovery plan, conservations plan, research plans (including those developed with Alaska Native co-management organizations), or post-delisting monitoring plans (for copies of these plans see **ADDRESSES**).

This is not a notice of availability of grant funds; moreover, any future funding is contingent on availability of funds. NMFS is seeking input on specific program priorities that might be considered for inclusion in an annual Alaska Pinniped Research Program that addresses the above-stated objectives. If NMFS proceeds with such a program, NMFS will issue a Federal Funding Opportunity notice to solicit applications for grants to address the selected priorities.
