SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of August 10, 2020 (85 FR 48124), we published a notification entitled “Request for Information and Comments on Consumption of Certain Uncommon Produce Commodities in the United States.” This action opened a docket with a 90-day comment period to receive information and comments related to certain produce commodities with no or low reported consumption in the database relied on to create the list of rarely consumed raw commodities that are exempt from the Standards for the Growing, Harvesting, Packing, and Holding of Produce for Human

Consumption (21 CFR part 112) (produce safety regulation).

FDA has received a request for a 60-day extension for this comment period in order to allow additional time for interested persons to develop and submit data, information, and/or comments for this Request for Information. We have concluded that it is reasonable to extend for 60 days the comment period for this Request for Information. The Agency believes that this extension allows adequate time for any interested persons to submit data, information, and/or comments for this Request for Information.

Air Plan Approval; Wisconsin; PSD and Nonattainment NSR Rule Clarifications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the Wisconsin state implementation plan (SIP), submitted by the Wisconsin Department of Natural Resources (WDNR) on September 30, 2008. Approving this revision makes Wisconsin rules consistent with Federal rules.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

I. Review of Wisconsin’s Submittal

This action proposes to approve the request EPA received on September 30, 2008 from WDNR to incorporate changes made by EPA to 40 CFR parts 51 and 52, effective on January 6, 2004 (68 FR 63021). As a result of petitions for reconsideration, EPA added two clarifications of underlying rules. EPA updated the definition of “Replacement Unit” to clarify that a replacement unit is reconstructed or takes the place completely of the unit being replaced, the replacement unit is functionally identical to the old unit, a replacement unit cannot change the design parameters of the existing process, and the replaced unit has to be permanently removed or rendered permanently unusable. In addition, EPA clarified that the PAL baseline calculation procedures for newly constructed units do not apply to modified units. Modified or existing units are not considered newly constructed units and therefore do not need to be added to the PAL level for the 24-month emissions period.
