Eagle Creek Reusens Hydro, LLC; Notice of Intent To Prepare an Environmental Assessment

On February 28, 2022, Eagle Creek Reusens Hydro, LLC filed a relicense application for the 12.5-megawatt Reusens Hydroelectric Project No. 2376 (Reusens Project or project). The project is located on the James River in Bedford and Amherst Counties, Virginia.

In accordance with the Commission's regulations, on May 13, 2025, Commission staff issued a notice that the Reusens Project was ready for environmental analysis (REA Notice). Based on the information in the record, including comments filed on the REA Notice, staff does not anticipate that licensing the Reusens Project would constitute a major federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an Environmental Assessment (EA) on the application to relicense the Reusens Project.¹

The EA will be issued and circulated for review by all interested parties. All comments filed on the EA will be analyzed by staff and considered in the Commission's final licensing decision.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members, and others, access publicly available information and navigate Commission processes.
