**Endangered and Threatened Wildlife  
and Plants; Threatened Species Status  
With Section 4(d) Rule for Cactus  
Ferruginous Pygmy-Owl**

**AGENCY:** Fish and Wildlife Service,  
Interior.

**ACTION:** Proposed rule.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), propose to list the cactus ferruginous pygmy-owl (*Glaucidium brasilianum cactorum*), a subspecies found in Mexico, southern Arizona, and southern Texas, as a threatened species under the Endangered Species Act of 1973, as amended (Act). This determination also serves as our 12-month finding on a petition to list the cactus ferruginous pygmy-owl. After a review of the best available scientific and commercial information, we find that listing the subspecies is warranted. Accordingly, we propose to list the cactus ferruginous pygmy-owl as a threatened species with a rule issued under section 4(d) of the Act (“4(d) rule”). If we finalize this rule as proposed, it would add this subspecies to the List of Endangered and Threatened Wildlife and extend the Act's protections to the subspecies. The finalization of this rule as proposed would include the issuance of a 4(d) rule. Designation of critical habitat was found to be prudent, but not determinable at this time. We also are notifying the public that we have scheduled an informational meeting followed by a public hearing on the proposed rule.

**DATES:** We will accept comments received or postmarked on or before February 22, 2022. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date.

**SUPPLEMENTARY INFORMATION:****Executive Summary**

*Why we need to publish a rule.* Under the Act, a species warrants listing if it meets the definition of an endangered species (in danger of extinction throughout all or a significant portion of its range) or a threatened species (likely to become endangered in the foreseeable future throughout all or a significant portion of its range). We have determined that the cactus ferruginous pygmy-owl meets the definition of a threatened species; therefore, we are proposing to list it as such. To the maximum extent prudent and determinable, we must designate critical habitat for any species that we determine to be an endangered or threatened species under the Act. Listing a species as an endangered or threatened species and designation of critical habitat can be completed only by issuing a rule.
