

(ii) The service provider's inability to meet the specific customer request for telephone numbers from the available numbers within the service provider's opened thousands-blocks.

(3) Upon a finding by a state commission that a service provider inappropriately assigned telephone numbers from an uncontaminated thousands-block, the NANPA or the Pooling Administrator shall suspend assignment or allocation of any additional numbering resources to that service provider in the applicable NPA until the service provider demonstrates that it does not have sufficient numbering resources to meet a specific customer request.

5. Add § 52.20 to read as follows:

§ 52.20 Thousands-block number pooling.

(a) *Definition.* Thousands-block number pooling is a process by which the 10,000 numbers in a central office code (NXX) are separated into ten sequential blocks of 1,000 numbers each (thousands-blocks), and allocated separately within a rate center.

(b) *General requirements.* Pursuant to the Commission's adoption of thousands-block number pooling as a mandatory nationwide numbering resource optimization strategy, all carriers capable of providing local number portability (LNP) must participate in thousands-block number pooling where it is implemented and consistent with the national thousands-block number pooling framework established by the Commission.

(c) *Donation of thousands-blocks.* (1) All service providers required to participate in thousands-block number pooling shall donate thousands-blocks with less than ten percent contamination to the thousands-block number pool for the rate center within which the numbering resources are assigned.

(2) All service providers required to participate in thousands-block number pooling shall be allowed to maintain at least one thousands-block per rate center, even if the thousands-block is less than ten-percent contaminated, as an initial block or footprint block.

(3) Telephone numbers assigned to customers of service providers from donated thousands-blocks that are contaminated shall be ported back to the donating service provider.

(d) *Thousands-Block Pooling Administrator.* (1) The Pooling Administrator shall be a non-governmental entity that is impartial and not aligned with any particular telecommunication industry segment, and shall comply with the same

neutrality requirements that the NANPA is subject to under this part.

(2) The Pooling Administrator shall maintain no more than a six-month inventory of telephone numbers in each thousands-block number pool.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA No. 00-1208, MM Docket No. 97-116; RM-9050 & RM-9123]

Radio Broadcasting Services; Estero, Everglades City, LaBelle, and Key West, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In response to a petition filed by Keith L. Reising a *Notice of Proposed Rule Making* was issued proposing the allotment of Channel 224A at Everglades City, Florida. See 62 FR 22900, April 28, 1997. In response to a counterproposal filed by InterMart Broadcasting West Coast, Inc., this document substitutes Channel 223C3 for Channel 223A at LaBelle, Florida, reallocates Channel 223C3 to Estero, Florida, and modifies the license for Station WWWD to specify Estero as its community of license. The coordinates for Channel 223C3 at Estero are 26-21-50 and 81-46-00. To accommodate the channel at Estero, we have substituted Channel 224C1 for Channel 223C1 at Key West, Florida, and modified the license for Station WEOW accordingly. The coordinates for Channel 224C1 at Key West are 24-40-35 and 81-30-41. The proposal for Everglades City is dismissed as it has been determined that a first local service at Estero will serve a larger population than an allotment at Everglades City. With this action, this proceeding is terminated.

DATES: Effective July 17, 2000.
