

With this information, BNSF should be able to uniformly address any necessary manufacturer bulletins and updates at the same time while gathering software and hardware information.

The software development time, the time it has taken to gather manufacturer information, the training time, the time for field personnel to gather information, the time for resolution of differences, and the time needed for verification of modification levels, all place BNSF's timeline to comply with 49 CFR 236.18(b) significantly beyond the required date of June 6, 2008. To that extent, BNSF requests a waiver for relief from the June 6, 2008, deadline established by 49 CFR 236.18(b), and asserts that it will need a 12-month extension to allow for the complete implementation of their SMCP no later than June 5, 2009. BNSF does identify specific milestones of an intended percentage of completion during the 12-month extension period.
