Notice of Availability of a Draft Programmatic Environmental Assessment for the Energy Efficient Rigid Wall Module and the Expeditionary Platoon Life Support Module

AGENCY: Department of the Army, DoD.

ACTION: Notice of availability and request for comments.

SUMMARY: The United States (U.S.) Army announces the availability of a draft programmatic environmental assessment (PEA) for the implementation of two Force Provider containerized basecamp systems: the Energy Efficient Rigid Wall Module (E2RWM) and the Expeditionary Platoon Life Support Module (EPLSM). The draft PEA analyzes the potential environmental impacts associated with the design, production, testing, training, fielding, demilitarization, and disposal of the E2RWM and EPLSM. This notice of availability (NOA) announces the start of the public review and comment period. After the U.S. Army addresses public comments submitted during the review period, a final PEA will be published. The PEA will inform the U.S. Army's decision regarding the deployment and use of the Force Provider systems.

DATES: Comments must be received 30 Days After Publication in the **Federal Register** of this NOA to be considered as part of the review process for this proposed action.

ADDRESSES: The draft PEA can be found on the Program Executive Office, Combat Support & Combat Service Support PdM FSS website at: <https://www.peocscss.army.mil/assets/Draft%20Programmatic%20Environmental%20Assessment%20for%20the%20Energy%20Efficient%20Rigid%20Wall%20Module%20and%20the%20Expeditionary%20Platoon%20Life%20Support%20Module.pdf>

FOR FURTHER INFORMATION CONTACT:

Ryan Bulger, 15 General Greene Avenue, Natick, MA 01760–5052, at ryan.j.bulger2.civ@army.mil or by phone at: 508–206–2890.

SUPPLEMENTARY INFORMATION:

Proposed Action: The draft PEA analyzes the Proposed Action, which is to implement the Force Provider E2RWM and EPLSM systems where needed to support various Army missions. Force Provider systems provide a modular, containerized base camp for personnel in the field, that can be quickly assembled to support short- and long-term missions. Force Provider modules and support systems have been used to support Army operations in places like Afghanistan, Kyrgyzstan, Uzbekistan, Iraq, and Kuwait, and to support foreign militaries. Within the U.S., Force Provider modules have been used to support natural disaster response and personnel training exercises. The draft PEA also analyzed the No Action alternative.

The Army has prepared this analysis as a broad Program-wide evaluation of the E2RWM and EPLSM systems. As a programmatic analysis, it is intended to streamline coordination and environmental analysis required for site-specific actions in the future. When a decision is made to deploy at a particular location, the Army would conduct follow-on, site-specific environmental analysis as required.

Availability of the draft PEA: The draft PEA and associated information are available on the Program Executive Office, Combat Support & Combat Service Support PdM FSS website at: <https://www.peocscss.army.mil/assets/Draft%20Programmatic%20Environmental%20Assessment%20for%20the%20Energy%20Efficient%20Rigid%20Wall%20Module%20and%20the%20Expeditionary%20Platoon%20Life%20Support%20Module.pdf>
