DEPARTMENT OF ENERGY

Western Area Power Administration

Notice of Final 2025 Olmsted Power Marketing Plan

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of final 2025 Olmsted Power Marketing Plan.

SUMMARY: Western Area Power Administration (WAPA), a Federal Power Marketing Administration of the Department of Energy (DOE), announces its Final 2025 Olmsted Power Marketing Plan (Marketing Plan) for the Colorado River Storage Project (CRSP) Management Center (MC). On September 30, 2024, all of Olmsted Power Plant Replacement Project (Olmsted Project) energy sales contracts (Contracts) will expire. This notice responds to comments received on the Proposed 2025 Olmsted Power Marketing Plan (Proposed Plan) published in the **Federal Register** June 1, 2022, and sets forth the Marketing Plan. The Marketing Plan specifies the terms and conditions under which WAPA will market energy from the Olmsted Project beginning October 1, 2024, through September 30, 2054. This Marketing Plan supersedes the previous Olmsted Project marketing plan. WAPA will offer new Contracts for the sale of energy to existing customers (Customers) as more fully described in the Marketing Plan. The Marketing Plan also establishes one resource pool (2034 Resource Pool) of up to 3 percent of the marketable resource under contract at the time of reallocation to be available for eligible new preference entities or Customers. The 2034 Resource Pool will be under Contract by October 1, 2034. WAPA will publish the application procedures for the 2034 Resource Pool in a separate **Federal Register** notice.

DATES: The Marketing Plan will become applicable April 20, 2023 in order to make power allocations and complete the other processes necessary to begin providing services on October 1, 2024.

FOR FURTHER INFORMATION CONTACT: Mr. Rodney G. Bailey, CRSP Manager, CRSP MC, Western Area Power Administration, 1800 South Rio Grande Avenue, Montrose, CO 81401, by email at Olmsted-Marketing@wapa.gov, by telephone at 970–252–3000, or by fax at 970–240–6282. Information on development of the Marketing Plan can be found at <https://www.wapa.gov/regions/CRSP/PowerMarketing/Pages/power-marketing.aspx>.

SUPPLEMENTARY INFORMATION:

Background

The Olmsted Project is located at the mouth of Provo Canyon in northern Utah and is part of the Central Utah Project, a participating project of CRSP. In 1987, the United States Department of the Interior, Bureau of Reclamation (Reclamation) secured ownership of the Olmsted Flowline, located in northern Utah, from PacifiCorp (formerly known as Utah Power and Light), and the associated water rights as an essential part of the Central Utah Project. In a related 1990 Settlement Agreement, the Olmsted generation facilities were acquired in condemnation proceedings by the United States to better secure and develop water rights for the Central Utah Project. As part of the condemnation proceedings, PacifiCorp continued generating power at Olmsted until September 22, 2015. Power generation at the site ceased on that date, and Reclamation assumed responsibility for operating the Olmsted Project.

A comprehensive evaluation of the existing 100-year-old Olmsted facilities determined it had greatly exceeded its operational life, and a replacement hydroelectric facility was necessary. On February 4, 2015, an Implementation Agreement (Agreement) for the Olmsted Project was signed by the Central Utah Water Conservancy District (District), Reclamation, DOE, and WAPA (Participants) to set forth the responsibilities of the participants and how the Olmsted Project would be funded. During the second quarter of calendar year 2016, pursuant to the Agreement, the District began constructing the 12-megawatt, \$42 million replacement hydroelectric facility and new power transmission line to the nearby Provo Power system. Olmsted Powerplant construction was completed in July 2018 and started commercial power production in October 2018. The Olmsted Project is a Federal facility operated and maintained by the District in connection with its Central Utah Project operations. The Olmsted Project is a “run-of-the-river” plant producing power only when water demands from downstream users necessitate water deliveries.

The Marketing Plan, herein, describes how CRSP Management Center will market Federal energy from the Olmsted Project beginning October 1, 2024, through September 30, 2054. As part of the Marketing Plan, WAPA will establish one 2034 Resource Pool of 3 percent of the net marketable resource (minus the District's allocation) under contract at the time of each reallocation to be available for eligible new
