Burden Hours: 10.

Needs and Uses: The September 11, 2001 attacks and Hurricane Katrina made apparent the need for public safety radio systems to interoperate, regardless of who manufactured the equipment. In response, and per Congressional direction, Department of Homeland Security and NIST developed

the Project 25 (P25) CAP to improve public safety confidence in purchasing land mobile radio (LMR) equipment built to P25 LMR standards, especially those P25 standards related to improving interoperability between different manufacturer's radio systems. A key part of the program involves NIST (Office of Law Enforcement Standards- OLES) experts assessing participating laboratories to determine that they have the requisite technical competence and resources needed to test P25 equipment. To perform these assessments, and continue the program, NIST needs to be able to collect essential information from laboratories interested in participating in the P25 CAP program.
