Title: Lower Colorado River Well Inventory.

OMB No. OMB No. 1006-0014.

Abstract: The Secretary of the Interior is responsible for accounting for all diversions of mainstream Colorado River water along the lower Colorado River, and for assuring that all Colorado River use is in accordance with a water use entitlement. This requires an inventory of wells along the lower Colorado River, and the gathering of specific information concerning these wells.

Description of respondents: All diversions of mainstream Colorado River water along the lower Colorado River must be accounted for and, for non-Indian diverters, in accordance with a water use contract with the Secretary of the Interior. This will affect every well owner and operator along the lower Colorado River in Arizona, California, and Nevada. Each diverter (including well pumpers) must be identified and their diversion locations and water use determined.

Frequency: These data will be collected only once for each well owner or operator as long as changes in water use, or other changes that would impact contractual or administrative requirements, are not made.

Estimated completion time: An average of 30 minutes is required for Reclamation to interview individual

well owners or operators. Reclamation will use the information collected during these interviews to complete the information collection form.

Annual responses: 1,000.

Annual burden hours: 500 hours.

Dated: July 17, 2002.

Gary Palmetier,

Manager, Property and Office Services Division.
