SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

The National Marine Fisheries Service (NMFS) proposes to collect economic information for fishing vessels in the West Coast Commercial Albacore Fishery. Information about revenues, variable and fixed costs, capital investment, vessel characteristics, and employment would be collected from vessel owners for a stratified random sample of vessels in this fishery. The data will be used to assess how fishermen will be impacted by and respond to federal regulation likely to be considered by fishery managers. Therefore, the data will be used to strengthen and improve fishery management decision-making, satisfy legal mandates under Executive Order 12866, the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act, and other pertinent statutes.

II. Method of Collection

The economic information sought will be collected via mail, phone and in-person surveys. Where feasible, the respondents will be provided with the option to respond to the mail survey on-line via email or other electronic forms such as an online survey tool.
