

12. Can analytical tools to assess transmission market power be developed to screen out behavior motivated by legitimate business interests and direct the Commission's attention to areas where transmission market power is more likely to be exercised?

13. Does the existence of significant transmission constraints constitute a barrier to entry that should be considered in authorizing market-based rates for a transmission provider?

#### *Non-Transmission Barriers to Entry Questions*

1. Can the lack of competition in fuel or other inputs constrain entry in the generation business? If so, how?

2. Can monopolization or attempted monopolization of future generating sites be a significant barrier to entry in generation? If so, how, and what can be done to remedy this problem?

3. Have financial constraints, such as access to capital or creditworthiness issues, been a serious barrier to entry in generation, or any other aspect of the electric power business?

4. Are there other barriers to entry the Commission should consider in granting market based rates? If so, how should the Commission test for the extent of harm to customers of competitors associated with such barriers?

5. Does the lack of an adequate competitive solicitation program by a utility that has monopsony power constitute a barrier to entry?
