

DEPARTMENT OF EDUCATION**34 CFR Chapter III****[Docket ID ED-2014-OSERS-0025]****Proposed Priority—National Institute on Disability and Rehabilitation Research—Rehabilitation Engineering Research Centers****AGENCY:** Office of Special Education and Rehabilitative Services, Department of Education.**ACTION:** Proposed priority.

[CFDA Number: 84.133E-5.]

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative Services proposes a priority for the Rehabilitation Engineering Research and Centers (RERC) Program administered by the National Institute on Disability and Rehabilitation Research (NIDRR). Specifically, this notice proposes a priority for an RERC on Technologies to Enhance Independence in Daily Living for Adults with Cognitive Impairments. We take this action to focus research attention on an area of national need. We intend the priority to contribute to improved outcomes related to independence in daily activities in the home, community, or workplace setting for adults with cognitive impairments.

DATES: We must receive your comments on or before May 2, 2014.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to www.regulations.gov to submit your comments electronically. Information on using Regulations.gov, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under “Are you new to the site?”

- *Postal Mail, Commercial Delivery, or Hand Delivery:* If you mail or deliver your comments about these proposed regulations, address them to Patricia Barrett, U.S. Department of Education, 400 Maryland Avenue SW., Room 5142, Potomac Center Plaza (PCP), Washington, DC 20202-2700.

Privacy Note: The Department’s policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at www.regulations.gov.

Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Patricia Barrett. Telephone: (202) 245-6211 or by email: patricia.barrett@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

SUPPLEMENTARY INFORMATION: This notice of proposed priority is in concert with NIDRR’s currently approved Long-Range Plan (Plan). The Plan, which was published in the **Federal Register** on April 4, 2013 (78 FR 20299), can be accessed on the Internet at the following site: www.ed.gov/about/offices/list/osers/nidrr/policy.html.

Through the implementation of the Plan, NIDRR seeks to: (1) Improve the quality and utility of disability and rehabilitation research; (2) foster an exchange of research findings, expertise, and other information to advance knowledge and understanding of the needs of individuals with disabilities and their family members, including those from among traditionally underserved populations; (3) determine effective practices, programs, and policies to improve community living and participation, employment, and health and function outcomes for individuals with disabilities of all ages; (4) identify research gaps and areas for promising research investments; (5) identify and promote effective mechanisms for integrating research and practice; and (6) disseminate research findings to all major stakeholder groups, including individuals with disabilities and their families in formats that are appropriate and meaningful to them.

This notice proposes one priority that NIDRR intends to use for one or more competitions in FY 2014 and possibly in later years. NIDRR is under no obligation to make an award under this priority. The decision to make an award will be based on the quality of applications received and available funding. NIDRR may publish additional priorities, as needed.

Invitation to Comment: We invite you to submit comments regarding this proposed priority. To ensure that your comments have maximum effect in developing the final priority, we urge you to identify clearly the specific topic that each comment addresses.

We invite you to assist us in complying with the specific requirements of Executive Orders 12866 and 13563 and their overall requirement of reducing regulatory burden that

might result from this proposed priority. Please let us know of any further ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the program.

During and after the comment period, you may inspect all public comments about this proposed priority in room 5142, 550 12th Street SW., PCP, Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Washington, DC time, Monday through Friday of each week except Federal holidays.

Assistance to Individuals with Disabilities in Reviewing the Rulemaking Record: On request we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for this notice. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Purpose of Program: The purpose of the Disability and Rehabilitation Research Projects and Centers Program is to plan and conduct research, demonstration projects, training, and related activities, including international activities, to develop methods, procedures, and rehabilitation technology that maximize the full inclusion and integration into society, employment, independent living, family support, and economic and social self-sufficiency of individuals with disabilities, especially individuals with the most severe disabilities. The Program is also intended to improve the effectiveness of services authorized under the Rehabilitation Act of 1973, as amended (Rehabilitation Act).

Rehabilitation Engineering Research Centers

The purpose of the RERCs, which are funded through the Disability and Rehabilitation Research Projects and Centers Program, is to achieve the goals of, and improve the effectiveness of, services authorized under the Rehabilitation Act through well-designed research, training, technical assistance, and dissemination activities in important topical areas as specified by NIDRR with guidance from its Rehabilitation Research Advisory Council. These activities are designed to benefit rehabilitation service providers, individuals with disabilities, family members, policymakers, and other research stakeholders. Additional information on the RERC program can be found at: <http://www2.ed.gov/programs/lerc/index.html#types>.

Program Authority: 29 U.S.C. 762(g) and 764(b)(3).

Applicable Program Regulations: 34 CFR part 350.

Proposed Priority

This notice contains one proposed priority.

RERC on Technologies To Enhance Independence in Daily Living for Adults With Cognitive Impairments

Background

Estimates from the most recent U.S. Census data indicate that in 2011 over 12 million Americans of all ages with functional impairments relied on personal assistance and other long-term services and supports (LTSS) in their home and community or in an institution, to perform daily activities to maintain their quality of living and, when possible, their independence (Brault, 2012; Kay, Harrington, and LaPlante, 2010). The need for LTSS is projected to increase dramatically in the coming decades to a high of 27 million in 2050 (Kay, Harrington, and LaPlante, 2010). This increase will be driven primarily by the aging of the population and the higher prevalence of disability among older individuals, but also by the increased longevity experienced by individuals with early onset disabilities (Field & Jette, 2007).

Associated with the increasing prevalence of disability generally is an increasing prevalence of cognitive impairments. Cognitive impairments refer to significant difficulties in remembering, concentrating, or making decisions resulting from physical, mental, or emotional conditions (U.S. Census Bureau, 2012). The 2011 ACS estimated that there were about 14.0 million individuals with cognitive impairments in the U.S. population. The prevalence of cognitive impairments among individuals who are 65 years and older is about 2.3 times the prevalence among individuals under 65 years; so, like disability in general, the prevalence of cognitive impairments is expected to increase substantially in future decades.

The increasing number of Americans with cognitive impairments will present a number of pressing challenges. Chief among these will be the need to promote and sustain independence in daily living and to find less intrusive and more cost-effective ways of delivering the services and supports people need to remain as independent as possible.

Today, about 10–11 million Americans, predominately adults, with physical, sensory, psychiatric, and cognitive impairments rely on personal assistance and other LTSS to perform daily activities in their home,

community, and workplace (Kaye, Harrington & LaPlante, 2010). LTSS refers to a range of person-to-person assistance received by people with disabilities that allows them to carry out their tasks of daily living and live as independently as possible. In 2011, expenditures from Federal and State Medicaid for LTSS to assist individuals with disabilities were estimated at \$211 billion (O'Shaughnessy, 2013).

Given the projected growth in the number of Americans with disabilities, the Nation has a substantial financial, as well as social interest, in developing technologies that enhance independence in daily living and can reduce the reliance on costly traditional LTSS (Commission on LTC, 2013). Particularly, in the area of support for adults with cognitive impairments, there is substantial potential for technologies to provide assistance that otherwise would need to be provided by human support providers (IOM, 2013; LeadingAge CAST, 2011; NCD, 2011).

Technology-based alternatives to direct services and supports for daily living include assistive and smart technologies, such as cueing, and prompting or coaching devices, home and community monitoring systems, community wayfinding applications for hand-held devices, socially assistive robotics, smart environments, workplace supports, computer and Web-based teaching programs, tele-supports, technology-based care, service coordination systems, and many other applications of existing technologies (IOM, 2013; LeadingAge CAST, 2011; NCD, 2011).

The need for assistance for individuals with cognitive impairments to sustain independence in daily activities in the home, community, and workplace will expand greatly in coming decades due to the aging of the population. At the same time, fewer family caregivers will be able to care for family members with disabilities for a number of reasons, such as limitations due to their own aging and national declines in savings rates, retirement asset accumulation, and private insurance purchase. The decline in assistance from family caregivers will result in increased pressure on Medicaid programs.

Advances in science and engineering and the increased availability of new and emerging technologies, applications of existing technologies to new circumstances, and ever-improving information technology infrastructures offer promise in responding to the challenges of assisting the increasing number of people with cognitive impairments to maintain independence

in daily living (IOM, 2013). Technology-based alternatives represent substantial opportunities to support independence and quality of life for adults with cognitive impairments in ways that are both liberating and cost-effective and that advance the widely endorsed goal of maintaining community living for individuals with disabilities and older adults (U.S. DHHS Community Living Initiative, 2010).

Proposed Priority

The Assistant Secretary for Special Education and Rehabilitative Services proposes the following priority for a Rehabilitation Engineering Research Center (RERC) on Technologies to Enhance Independence in Daily Living for Adults with Cognitive Impairment. This RERC must focus on innovative technological solutions, new knowledge, and implementation strategies that enhance the independence and self-management of adults with cognitive impairment.

Under this priority, the RERC must research, develop, and evaluate new technologies, or adapt and evaluate existing technologies, to enhance the ability of adults with cognitive impairment to perform daily activities of their choice in the home, community, or workplace. Technologies developed or adapted must be designed for commercialization as consumer products or for integration into rehabilitation practice or relevant service delivery systems. Research and development topics under this priority may include, but are not limited to: Monitoring and prompting technologies or other information or communication aids; assistive technologies, including socially assistive robotics; mobile and wearable technologies; virtual reality; and care coordination or tele-health, tele-rehabilitation and other tele-support systems to facilitate improved activities of daily living.

In responding to this priority, applicants must specify the target populations or subgroups of adults with cognitive impairments that they intend to focus on and identify the setting or settings for which they intend to develop technologies: Home, community, or workplace. Applicants must also limit the number of research and development projects to a maximum of eight, and restrict the range of different types of technologies to what is manageable with available resources.

Under this priority, the RERC must be designed to contribute to the following outcomes:

(a) Increased technical and scientific knowledge relevant to technologies for increasing independence in daily living for adults with cognitive impairments. The RERC must contribute to this outcome by establishing a rigorous

research and development plan that is balanced between technology development or adaption and technology evaluation and incorporates needs assessment, usability testing, and intervention development or efficacy studies, as appropriate. The research and development plan must be designed to build a base of evidence for assessing the usability, accessibility, acceptance, utility, and cost-benefit of technologies intended to improve independence in daily activities for adults with cognitive impairment in the home, community, or workplace settings. The RERC must contribute to this outcome by:

(i) Building a transdisciplinary team of collaborators from relevant disciplines, such as: Rehabilitation and bio-engineering, computer science, human factors specialists, cognitive and behavioral scientists, clinicians and other relevant providers;

(ii) Conducting research and research syntheses or secondary analysis of existing data to evaluate user needs and specify the accessibility, acceptance, and human factors design features that will need to be built into the technology solutions developed and evaluated by the RERC to accommodate the cognitive impairments and preferences of the target population;

(iii) Conducting rigorous usability testing in the settings in which the technology will be used;

(iv) Developing and prioritizing a list of evaluation topics that, when addressed, will lead to research-based information on the utility or efficacy of technology solutions developed by the RERC; and

(v) Involving key stakeholders in the research and research planning activities to maximize the relevance and usefulness of the research products being developed. Stakeholders can include, but are not limited to, individuals with disabilities and their families; national, State, or local-level policymakers, administrators, or service providers; and industry representatives.

(b) Improved usability and effectiveness of technologies, products, devices, systems, performance guidelines, and assessment tools through systematic development or adaptation, testing, and evaluation of innovations. In developing the technologies under this priority the RERC must:

(i) Incorporate user-centered designed strategies and consider the context in which the technology product, device, or system will be used;

(ii) Emphasize the principles of universal design and, as appropriate, conform to human factors standards, such as reliability, safety, and

simplicity; accessibility and acceptability to users; protective of users' privacy preferences; intuitive user interfaces; feedback in meaningful sensory modalities; and appropriateness to diverse populations;

(iii) Incorporate ongoing training opportunities or user supports into the design of the technology or into the practice settings or delivery systems in which the technology will be integrated; and

(iv) Ensure that the technologies are interoperable within existing rehabilitation systems or home or mobile technologies and that they communicate with existing information technology systems, as appropriate.

(c) Improved research capacity areas that will contribute to enhancing the ability of adults with cognitive impairment to perform daily activities. The RERC must contribute to this outcome by collaborating with the relevant institutions of higher education, professional associations, clinicians and service providers, and other researchers or educators, as appropriate.

(d) Improved awareness and understanding of cutting-edge developments and promising technology solutions that will contribute to enhancing the ability of adults with cognitive impairment to perform daily activities. The RERC must contribute to this outcome by identifying and communicating with relevant stakeholders, including NIDRR, individuals with disabilities and their representatives, disability organizations, service providers, professional journals, manufacturers, and other interested parties regarding trends and evolving product concepts related to its designated priority research area.

(e) Increased impact of research and development activities carried out under this priority area. The RERC must contribute to this outcome by:

(i) Providing technical assistance to relevant public and private organizations, individuals with disabilities and their families, LTSS providers, and employers on policies, guidelines, and standards; and

(ii) Establishing or contributing to an existing program or service that provides objective information and technical and consumer reviews about technologies of promise to support independence in daily living for adults with cognitive impairments.

(f) Increased transfer of RERC-developed technologies to the marketplace for widespread testing and use by developing and implementing a plan to ensure that technologies developed by the RERC are made

available to the public or to service delivery systems that serve the public. This technology transfer plan must be developed in the first year of the project period in consultation with the NIDRR-funded Center on Knowledge Translation for Technology Transfer.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Final Priority

We will announce the final priority in a notice in the **Federal Register**. We will determine the final priority after considering responses to this notice and other information available to the Department. This notice does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This notice does *not* solicit applications. In any year in which we choose to use this priority, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed this regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these

techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing this proposed priority only upon a reasoned determination that its benefits would justify its costs. In choosing among alternative regulatory approaches, we selected those approaches that would maximize net benefits. Based on the analysis that follows, the Department believes that this proposed priority is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action would not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department’s programs and activities.

The benefits of the Rehabilitation Engineering Research Centers Program have been well established over the years. Projects similar to the RERCs have been completed successfully, and the proposed priority will generate new knowledge through research. The new RERCs will generate, disseminate, and promote the use of new information that would improve outcomes for individuals with disabilities in the areas of community living and participation, employment, and health and function.

Intergovernmental Review: This program is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) by contacting the Grants and Contracts Services Team, U.S. Department of Education, 400 Maryland Avenue SW., Room 5075, PCP, Washington, DC 20202–2550. Telephone: (202) 245–7363. If you use a TDD or TTY, call the FRS, toll free, at 1–800–877–8339.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in

text or Adobe Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: March 27, 2014.

Michael K. Yudin,

Acting Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 131

[EPA-HQ-OW-2009-0596; FRL-9908-18-OW]

RIN 2040-AF50

Water Quality Standards for the State of Florida's Lakes and Flowing Waters; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to withdraw federal water quality standards applicable to waters of the state of Florida now that Florida has adopted and EPA has approved relevant state standards. On December 6, 2010, EPA published a rule finalizing numeric nutrient standards for Florida's lakes, springs, and flowing waters outside of the South Florida Nutrient Watershed Region. EPA established these water quality standards to protect Florida's Class I and III freshwaters from nitrogen and phosphorus pollution. On November 30, 2012, June 27, 2013, and September 26, 2013, EPA approved numeric nutrient standards adopted by the state of Florida for certain waters in the state.

Some of the water body types and provisions covered by state-adopted water quality standards were also included in EPA's final inland waters rule (criteria for Florida's lakes and springs, approaches to protect downstream lakes, and a provision for developing Site-Specific Alternative Criteria). EPA is now proposing to withdraw the overlapping federally-promulgated water quality standards to allow Florida to implement their state-

adopted, EPA-approved water quality standards to address nutrient pollution in Florida's waters. Additionally, EPA is not finalizing three 2012 federal proposed rules related to nutrient pollution in Florida.

DATES: Comments must be received on or before June 2, 2014.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OW-2009-0596, by one of the following methods:

1. *www.regulations.gov*: Follow the on-line instructions for submitting comments.

2. *Email*: ow-docket@epa.gov

3. *Mail to*: Water Docket, U.S. Environmental Protection Agency, Mail code: 2822T, 1200 Pennsylvania Avenue NW., Washington, DC 20460, Attention: Docket ID No. EPA-HQ-OW-2009-0596.

4. *Hand Delivery*: EPA Docket Center, EPA West Room 3334, 1301 Constitution Avenue NW., Washington, DC 20004, Attention: Docket ID No. EPA-HQ-OW-2009-0596. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-HQ-OW-2009-0596. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or email. The www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

Docket: All documents in the docket are listed in the www.regulations.gov

index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in www.regulations.gov or in hard copy at a docket facility. The Office of Water (OW) Docket Center is open from 8:30 a.m. until 4:30 p.m., Monday through Friday, excluding legal holidays. The OW Docket Center telephone number is (202) 566-2426, and the Docket address is OW Docket, EPA West, Room 3334, 1301 Constitution Avenue NW., Washington, DC 20004. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744.

FOR FURTHER INFORMATION CONTACT:

Erica Fleisig, U.S. EPA Headquarters, Office of Water, Mailcode: 4305T, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone number: (202) 566-1057; email address: fleisig.eric@epa.gov.

SUPPLEMENTARY INFORMATION: This proposed rule is organized as follows:

- I. General Information
 - A. Which water bodies are affected by this action?
 - B. What entities may be affected by this action?
 - C. What should I consider as I prepare my comments for EPA?
 - D. How can I get copies of this document and other related information?
- II. Background
 - A. Background on EPA's Inland Rule, Amended Determinations, and Approval of State Criteria
 - B. 2014 District Court Ruling and Modification of Consent Decree
 - C. Proposed Withdrawal of Federal Criteria for Lakes, Springs, and DPVs
- III. Statutory and Executive Order Reviews
 - A. Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review)
 - B. Paperwork Reduction Act
 - C. Regulatory Flexibility Act
 - D. Unfunded Mandates Reform Act
 - E. Executive Order 13132 (Federalism)
 - F. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)
 - G. Executive Order 13045 (Protection of Children From Environmental Health and Safety Risks)
 - H. Executive Order 13211 (Actions That Significantly Affect Energy Supply, Distribution, or Use)
 - I. National Technology Transfer Advancement Act of 1995
 - J. Executive Order 12898 (Federal Actions To Address Environmental Justice in
