

November 30, 2004, under OMB control number 0910-0001.

The comment also stated that FDA's estimate of 100 respondents for § 314.81(b)(2)(i), (b)(2)(vi)(c), and (b)(2)(vii) is low, and that over 3,000 responses should be expected annually. Under these sections, applicants must submit in their annual report: (1) A brief summary of whether labeling supplements for pediatric use have been submitted and whether new studies in the pediatric population have been initiated; (2) an analysis of available safety and efficacy data in the pediatric population and changes proposed in the labeling based on this information; and (3) a status report containing a statement indicating whether postmarketing clinical studies in pediatric populations were required by FDA under § 201.23, and if so, the status of these studies. Thus, only the annual reports for those approved applications that contain or will contain pediatric use information would be covered by these sections. As a result of more recent data, FDA has revised its estimates of the number of responses and respondents for these sections. Based on the number of currently approved applications and the number of pending applications that contain pediatric use information, FDA estimates approximately 119 applicants will submit approximately 158 annual reports under § 314.81(b)(2)(i), approximately 119 applicants will submit approximately 158 annual reports under § 314.81(b)(2)(vi)(c), and approximately 6 applicants will submit approximately 6 annual reports under § 314.81(b)(2)(vii).

As a result of more recent FDA data on the number of requests for deferrals and waivers received by the agency in 2001, FDA has also revised the estimates for § 314.55(b) and (c) as reflected in the table 1 of this document.
