Abstract: The sources subject to this rule (i.e., extraction plants, ceramic plants, foundries, incinerators, propellant plants, and machine shops which process beryllium and its derivatives), complying with the onetime only stack test, would be required to submit initial notification reports and a one-time-only report with the emission limit determination. The sources complying with the alternative ambient air quality limit by operating a continuous monitor in the vicinity of the affected facility are required to submit a monthly report of all measured concentrations. Records shall be retained for two years.

Form Numbers: None.

Respondents/affected entities:

Sources processing beryllium ore, beryllium, beryllium oxides, beryllium alloys, or beryllium-containing waste.

Respondent's obligation to respond:

Mandatory (40 CFR part 61, subpart C).
Estimated number of respondents: 33 (total).

Frequency of response: Monthly and occasionally.

Total estimated burden: 2,629 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$292,208 (per year), includes \$35,000 in either annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an apparent increase of two hours in the total estimated respondent burden as currently identified in the OMB Inventory of Approved Burdens. This increase is due to rounding, and is not due to any program changes. The most-

recently approved ICR rounded the burden hours associated with recordkeeping for operating parameters and emissions to the nearest whole number. In contrast, burden hours are rounded to two decimal places in this ICR, resulting in an apparent increase of two hours.

There is an increase in the respondent cost from the most recently-approved ICR due to the use of updated labor rates. This ICR references labor rates from the Bureau of Labor Statistics to calculate the respondent burden cost.

Director, Collection Strategies Division.

The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions specified at 40 CFR part 60, subpart JJJJ. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of stationary spark ignition internal combustion engines.

Respondent's obligation to respond:

Mandatory (40 CFR part 60, subpart JJJJ).
Estimated number of respondents: 17,811 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 23,286 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,641,926 (per year), which includes \$2,364,136 annualized capital or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to adjustments in the number of new or modified sources and updated labor rates. This ICR accounts for the industry growth since the last ICR renewal period and uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

Additionally, the capital/startup and O&M costs as calculated in section 6(b)(iii) have been corrected to reflect initial performance tests as a one-time capital/startup costs, rather than ongoing O&M costs. This results in an increase in capital costs, and a corresponding decrease in O&M costs.

ICR Status: This ICR is scheduled to expire on January 31, 2014. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. EPA established the procedures described in 40 CFR part 2, subparts A and B, to protect the confidentiality of information as well as the rights of the public to obtain access to information under the Freedom of Information Act (FOIA). In accordance with these regulations, when EPA finds it necessary to make a final confidentiality determination (e.g., in response to a FOIA request or in the course of rulemaking or litigation, a resubstantiation of a prior claim, or an advance confidentiality determination), it shall notify the affected business and provide an opportunity to submit a substantiation of confidentiality claims. This ICR relates to information EPA needs to collect to assist in determining whether previously submitted information is entitled to confidential treatment.
