Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing (40 CFR part 63, subpart AAAAAAA) were proposed on July 9, 2009, promulgated on December 2, 2009, and amended on March 18, 2010. These regulations apply to existing facilities and new facilities that are Area Sources and that either process asphalt or manufacture asphalt roofing products. New facilities include those that commenced either construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart AAAAAAA.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to the NESHAP.

Form Numbers: None.

Respondents/affected entities:

Existing and new facilities that are area sources and that process asphalt or manufacture asphalt roofing products.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart AAAAAAA).

Estimated number of respondents: 59 (total).

Frequency of response: Semiannually.

Total estimated burden: 2,370 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$286,000 (per year), which includes \$885 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to an adjustment. The adjustment increase is due to an increase in the number of respondents based on review of the results of a Section 114 request from 2017, EPA's ECHO database, and facility permits. There is an increase in the operation and maintenance (O&M) costs due to the increased number of respondents.

Director, Regulatory Support Division.
