

Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

Agency: U.S. Census Bureau.

Title: Annual Retail Trade Survey.

OMB Control Number: 0607–0013.

Form Number(s): SA–44, SA–44A, SA–44C, SA–44D, SA–44E, SA–44N, SA–44S, SA–44T.

Type of Request: Revision of a currently approved collection.

Number of Respondents: 20,067.

Average Hours per Response: Because of the inclusion of the detailed operating expenses questions in the 2017 survey year ARTS (collected in 2018), the average burden per respondent for that year will be 3 hours and 19 minutes. In survey years 2018 and 2019, the average burden will be 37 minutes.

Burden Hours: 30,531.

Needs and Uses: The Annual Retail Trade Survey (ARTS) covers employer firms with establishments located in the United States and classified in retail trade sector as defined by the North American Industry Classification System (NAICS). The survey requests firms to provide annual sales, sales tax, e-commerce sales, year-end inventories held inside and outside the United States, total operating expenses, purchases, and accounts receivable. We also request, for selected industries, sales and e-commerce sales by merchandise line.

The data collected in the ARTS provide a current statistical picture of the retail portion of consumer activity. These data are collected to provide a sound statistical basis for the formation of policy by various government agencies, as well as to serve as a benchmark for the estimates compiled from the Monthly Retail Trade Survey. Results will be made available, at the United States summary level, for selected retail trade industries approximately fifteen months after the end of the reference year.

Every 5 years, ARTS requests data on detailed operating expenses. During the 2017 collection survey year that will occur in 2018, ARTS will collect detailed operating expenses. The last time ARTS collected detailed operating expenses was in 2013 for the 2012 survey year. Estimates are published based on the NAICS, which has been widely adopted throughout both the public and private sectors.

This request is for the clearance of eight electronic report worksheets, the SA–44, SA–44A, SA–44C, SA–44D, SA–44E, SA–44N, SA–44S, and SA–44T. These eight electronic worksheets enable us to collect information on a

NAICS basis and to request similar data items. Variations in the electronic worksheets are needed to address the size of the firm, kind-of-business, or data items requested.

The Bureau of Economic Analysis (BEA) uses the data to estimate the change in private inventories component of gross domestic product (GDP) and output in both the benchmark and annual input-output (I–O) accounts and GDP by industry. Data on sales taxes are also used to prepare estimates of GDP by industry and to derive industry output for the I–O accounts. Data on detailed operating expenses, are collected on this survey quinquennially and are used to produce national estimates of value added, gross output, and intermediate inputs and serve as a benchmark for the annual industry accounts, which provide the control totals for the GDP-by-state accounts.

The Bureau of Labor Statistics uses the data as input to its Producer Price Indexes and in developing productivity measurements. The Federal Reserve Board uses the accounts receivables balances to measure consumer credit. Private businesses use the estimates in computing business activity indexes.

Other government agencies and businesses use the data to satisfy a variety of public and business needs such as economic market analysis, company performance, and forecasting future demands.

Affected Public: Business or other for-profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13, United States Code, Section 131 and 182.

Title: Quarterly Survey of Foreign Direct Investment in the United States—Transactions of U.S. Affiliate with Foreign Parent.

OMB Control Number: 0608–0009.

Form Number: BE–605.

Type of Request: Regular submission.

Number of Responses: 17,200 annually.

Average Hours per Response: One hour is the average, but may vary considerably among respondents because of differences in company size and complexity.

Estimated Total Annual Burden Hours: 17,200.

Needs and Uses: The Quarterly Survey of Foreign Direct Investment in the United States—Transactions of U.S. Affiliate with Foreign Parent (Form BE–605) obtains quarterly data on transactions and positions between foreign-owned U.S. business enterprises and their “affiliated foreign groups” (i.e., their foreign parents and foreign affiliates of their foreign parents). The sample data are used to derive universe estimates of direct investment transactions, positions, and income in nonbenchmark years from similar data reported in the BE–12, Benchmark Survey of Foreign Direct Investment in the United States, which is conducted every five years and will next be conducted for the fiscal year ending in 2017. The data collected through the BE–605 survey are essential for the preparation of the U.S. international transactions, national income and product, and input-output accounts and the international investment position of the United States. The data are needed to measure the size and economic significance of foreign direct investment in the United States, measure changes in such investment, and assess its impact on the U.S. economy.

Affected Public: Businesses or other for-profit organizations.

Frequency: Quarterly.

Respondent's Obligation: Mandatory.

On March 17, 2008, Darryl W. The TDO subsequently has been renewed in accordance with Section 766.24(d), including most recently on June 27, 2017.³ Parties have been added to or
