

nature of these trailing-gear interactions may result in serious injuries long after the whale is initially sighted. It is unclear at this point whether to classify these as serious injuries or not, but by including them in Table 1, the injuries are effectively tallied as a "take", which is more conservative than excluding them for lack of classification. The 1997 incident of a humpback whale swimming away with a salmon hook and many feet of monofilament falls in this category and is retained in Table 1.

*Comment 29:* The Commission suggested adding a figure showing population trend data of blue whales (Eastern North Pacific stock) to allow the reader to evaluate the apparent decline suggested under Current Population Trend.

*Response:* A figure showing line-transect abundance estimates from 1991–2001 in California waters has been added to this SAR to indicate trend.
