

a couple of hours to minimize incidental mortalities of non-target species.

Sea turtle handling and release equipment and instructions will be onboard the vessel at all times while engaged in this research activity. Additionally, the research team is trained and experienced in sea turtle handling and release techniques. Past research has also associated sea turtle interactions and other bycatch species with certain oceanographic features, such as warm core rings. Because the goal of this research would be to tag and collect information on the abundance and distribution of sharks, the researchers would limit their activity in these areas to reduce potential interactions with sea turtles and other non-targeted species.

Based on NMFS' initial review, NMFS believes that this research would be excluded from the requirement to prepare either an Environmental Assessment or Environmental Impact Statement pursuant to the National Environmental Policy Act because it is of limited size and magnitude and is not expected to have significant effects individually or cumulatively on the environment. As noted above, limited numbers of incidental interactions and/or mortalities are anticipated to occur while conducting this research. While scientific research is not regulated under the Magnuson-Stevens Act, NMFS would track and monitor all sources of mortalities for sharks. Any mortalities of ATCA regulated species (i.e., billfish and tuna) would be counted against the appropriate quotas, and active measures will be taken to minimize interactions and mortalities of these non-target species. Further, all fish tagged would be released alive, with minimal or no post-release mortality anticipated. However, if any HMS die during the collection and/or tagging process, age structures (otoliths), stomachs, blood samples, samples for isotope work, and reproductive tissues would be sampled.

This research may benefit fishery managers and scientists by providing additional data on the importance of the Northeastern U.S. closed area ecosystem in the management and conservation of HMS in the Atlantic Ocean.

The regulations that would prohibit the proposed activities include requirements for permits and fees (50 CFR 635.4), vessel reporting (50 CFR 635.4), size limits (50 CFR 635.20), fishing in a closed area (50 CFR 635.21(c)(i)), hook requirements (50 CFR 635.21(c)(5)(iii)(C)), retention limits for bluefin tuna (50 CFR 635.23), commercial retention limits for sharks

and swordfish (50 CFR 635.24), catch and release (50 CFR 635.26), commercial quotas (50 CFR 635.27), closures (50 CFR 635.28), possession at sea and landing (50 CFR 635.30), and VMS (50 CFR 635.69).

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of this program is to: (1) Improve results for children with disabilities by

promoting the development, demonstration, and use of technology, (2) support educational media services activities designed to be of educational value in the classroom setting to children with disabilities, and (3) provide support for captioning and video description that is appropriate for use in the classroom setting.

Priority: In accordance with 34 CFR 75.105(b)(2)(iv) and (v), this priority is from allowable activities specified in the statute, or otherwise authorized in the statute (see sections 674 and 681(d) of the Individuals with Disabilities Education Act (IDEA)).

Absolute Priority: For FY 2006 this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Technology and Media Services for Individuals With Disabilities—Captioned and Described Educational Media: Selection, Closed Captioning, Video Description, and Distribution

Priority

This priority supports one cooperative agreement, for the selection, acquisition, closed captioning, video description, and distribution of free educational media through such mechanisms as a loan service. The educational media are to be used in classroom settings by students with hearing or vision impairments and teachers and paraprofessionals who are directly involved in elementary or secondary classroom activities for these students. This priority would ensure that students who have hearing or vision impairments will benefit from the same educational media used to enrich the educational experiences of students who do not have hearing or vision impairments.

The project must:

(a) Develop strategies and procedures to be used in identifying program titles that meet the needs of elementary and secondary schools and submit lists of these program titles to OSEP for approval.

(b) Obtain media from producers and distributors identified under paragraph (a) for screening, evaluation, and, if necessary, closed captioning and video description. After screening and evaluating these media, select those that closely match the needs of elementary and secondary schools, taking into account the media most commonly used in school districts across the nation.

(c) Make arrangements with producers and distributors to purchase, distribute, and if necessary, closed caption and describe selected media, including distribution in alternate formats. Closed

captioned and described masters must be made available to producers and distributors in an effort to promote the use of closed captioned and described media.

(d) For selected media purchased by the grantee, prepare closed captions and descriptions in accordance with established industry guidelines and guidelines developed under this priority for closed captioned and described media, taking into account the grade level of the material as well as the age and vocabulary levels of the likely target audience.

(e) Establish guidelines for closed captioning and video description by service providers to ensure even and maximum participation of service providers.

(f) Establish and maintain a list of service providers that it has approved to provide closed captioning or video description under this priority.

(g) Develop and implement quality control guidelines and procedures for checking each media product after it has been closed captioned and described.

(h) Prepare up to 300 copies of each title, once it has been captioned and described, for distribution through the distribution system developed by the grantee under the project, including titles that are closed captioned and described in Spanish, consistent with the identified needs of elementary and secondary schools.

(i) Operate a system for distribution of captioned and described educational media, consisting of local and regional depositories and one central educational distribution center. Local and regional depositories may include State schools and public or private schools. Explore and utilize alternate delivery methods and materials, including programs and materials associated with new and emerging technologies, such as video streaming, and other forms of multimedia. During year two of the project, work toward phasing out local and regional depositories in favor of more efficient distribution methods that use new and emerging technologies.

(j) Establish computerized registration procedures, accessible via the Internet, that will be used to register users of the distribution system, schedule captioned and described media retrieval, and track and record consumer feedback and usage information.

(k) Prepare, update, and distribute copies of a catalog listing of all closed captioned and described media available for distribution as they become available. Catalogs must be made available online.

(l) Develop and maintain a comprehensive database containing

information related to the availability of captioned and described educational media, information regarding the captioned and described media loan service, a list of closed captioning and description service providers, and procedures for applying for loan services. In addition, the project shall maintain a clearinghouse of information on the subject of captioning and description for use by consumers, agencies, corporations, businesses, and schools. All information must be accessible via the Internet.

(m) Establish an advisory group of at least eight members, consisting of one or more video producers and distributors, closed captioning and video description service providers, parents of students with hearing or vision impairments, and public and private school administrators, or educational personnel. This advisory group shall meet annually and develop and implement criteria for evaluating program activities, taking into consideration and incorporating the reactions and suggestions from consumers into the selection and closed captioning and description process, provide input regarding the usefulness of program activities and services, review effectiveness of the distribution system and make recommendations to ensure maximum effectiveness.

In deciding whether to continue this project for the fourth and fifth years, we will consider the requirements of 34 CFR 75.253(a), and in addition—

(a) The recommendation of a review team consisting of experts selected by the Secretary. This review will be conducted during the last half of the project's second year in Washington, DC. Projects must budget for the travel associated with this review; and

(b) The timeliness and effectiveness with which all requirements of the negotiated cooperative agreement have been or are being met by the project.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (APA) (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities. However, section 681(d) of the IDEA makes the public comment requirements of the APA inapplicable to the priority in this notice.

Please note the following:

- Your participation in Grants.gov is voluntary.
- When you enter the Grants.gov site, you will find information about submitting an application electronically through the site, as well as the hours of operation.

- Applications received by Grants.gov are time and date stamped. Your application must be fully uploaded and submitted, and must be date/time stamped by the Grants.gov system no later than 4:30 p.m., Washington, DC time, on the application deadline date.

Except as otherwise noted in this section, we will not consider your application if it is date/time stamped by the Grants.gov system later than 4:30 p.m., Washington, DC time, on the application deadline date. When we retrieve your application from Grants.gov, we will notify you if we are rejecting your application because it was date/time stamped by the Grants.gov system after 4:30 p.m., Washington, DC time, on the application deadline date.

- The amount of time it can take to upload an application will vary depending on a variety of factors including the size of the application and the speed of your Internet connection. The Department will contact you after a determination is made on whether your application will be accepted.

Note: Extensions referred to in this section apply only to the unavailability of or technical problems with the Grants.gov system.
