Overview of This Information Collection

Title: Report of Diversion.

OMB Number: 1651–0025.

Form Number: CBP Form 26.

Current Actions: Extension with change of an existing information collection.

Type of Review: Extension (with change).

Affected Public: Businesses.

Abstract: CBP Form 26, *Report of Diversion*, is used to track vessels traveling coastwise from U.S. ports to other U.S. ports when a change occurs in scheduled itineraries. This form is initiated by the vessel owner or agent to notify and request approval by CBP for a vessel to divert while traveling coastwise from a U.S. port to another U.S. port, or a vessel traveling to a foreign port having to divert to a U.S. port when a change occurs in the vessel itinerary. CBP Form 26 collects information such as the name and nationality of the vessel, the expected port and date of arrival, and information about any related penalty cases, if applicable. This information collection is authorized by 46 U.S.C. 60105 and is provided for in 19 CFR 4.91. CBP Form 26 is accessible at: <https://www.cbp.gov/newsroom/publications/forms?title=26>.

Proposed Change: This form is anticipated to be submitted electronically as part of the maritime forms automation project through the Vessel Entrance and Clearance System (VECS), which will eliminate the need for any paper submission of any vessel entrance or clearance requirements under the above referenced statutes and regulations. VECS will still collect and maintain the same data, but will automate the capture of data to reduce or eliminate redundancy with other data collected by CBP.

The Absentee-Shawnee Tribe of Indians of Oklahoma; Eastern Shawnee Tribe of Oklahoma; Shawnee Tribe; and Stockbridge Munsee Community, Wisconsin were invited to consult but did not participate. History and Description of the Remains

In 1969, human remains representing, at minimum, one individual were removed from the Eshman Farm site in Muskingum County, OH. The site is upriver from the Muskingum River Bridge at Dresden. It contained a low burial mound located in the side yard near the Eschman House. This low burial mound was excavated by amateur archeologists Glenn Longaberger and Frank Stratman in 1969. The site collection was donated to the Johnson-Humrickhouse Museum in 1974, shortly following the death of Glenn Longaberger. The Museum has no accession record or description of the excavation, only a 1983 article in the *Ohio Archaeologist* by Jeff Carskadden and Jim Morton. The fragmentary human remains belong to an individual of unknown sex thought to be between 13-20 years old. Based on information in the Carskadden and Morton article, the human remains have been identified as Shawnee. No known individual was identified. The three associated funerary objects are one Micmac stone pipe, one lock plate and cock from a flint lock rifle, and one brass harness bell.

The Eschman Farm site was occupied during the Hopewell Period (200 BCE to 500 CE). Subsequently, it was occupied by the Shawnee Tribe. Longaberger determined the site to be Hopewell based on the mound architecture, the artifacts, and the Hopewell presence in
