

White HIV/AIDS Program (RWHAP) recipients. HRSA was identified as a distribution partner due to the health care services provided to individuals with HIV and the number of uninsured and underinsured persons seen in RWHAP and Health Center Programs. The allotments were meant to supplement, not replace, vaccine efforts at jurisdictional levels.

To expedite dispensing the vaccine, HRSA provided the vaccine to dually funded RWHAP Part C and Health Center providers that care for at-risk populations. Most of the identified providers already had access to the Health Partner Ordering Portal (HPOP), a system HHS uses to quickly distribute the vaccines to clients. For providers who elected to receive the vaccine but did not have access to HPOP, HRSA registered them in the HPOP system. HRSA made 73 shipments to 57 (53 dually funded and four Part C only) RWHAP recipients who elected to receive and distribute the mpox vaccine.

RWHAP recipients that receive shipments of the JYNNEOS vaccine are required to upload administration and inventory/wastage data into HPOP on a weekly basis. The information collected includes federal or state PIN, contact, lot

number, description, number of vials, expiration date, courses/doses/bottles administered, bottles available, wastage, reason, and date reported.

RWHAP recipients who accept JYNNEOS vaccine from HRSA are also asked to submit data with information necessary for HRSA to assess the quantity of mpox vaccines requested and its distribution status. The information collected includes grant number; recipient name, point of contact, and phone number; shipping address; shipping point of contact, email address, and phone number; and number of boxes of mpox vaccine requested.

As a result of the PHE for mpox, the Assistant Secretary for Planning and Evaluation issued a Paperwork Reduction Act waiver for collection of these data. Since the PHE ended on January 31, 2023, HRSA is proposing to continue collecting these data until the end of 2025. This action will help to improve HRSA's ability to provide additional resources and assistance to RWHAP recipients, which may result in increased prevention of mpox among RWHAP clients.

Need and Proposed Use of the Information: HRSA will use the

information collected to (1) assess and improve its response to the mpox pandemic and (2) improve HRSA's ability to provide resources and assistance to RWHAP recipients in future public health emergencies.

Likely Respondents: Dually funded RWHAP Part C and Health Center recipients who accepted at least one shipment of mpox vaccine from HRSA.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

| Form name | Number of respondents | Number of responses per respondent | Total responses | Average burden per response (in hours) | Total burden hours |
|--|-----------------------|------------------------------------|-----------------|--|--------------------|
| Vaccine Distribution Report | 57 | 1 | 57 | 0.5 | 28.5 |
| Wastage Upload Report | 57 | 1 | 57 | 23.4 | 1,333.8 |
| Therapeutic Courses (Administered and Available) | 57 | 1 | 57 | 10.4 | 592.8 |
| Total | 171 | | | | 1,955.1 |

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.
