

line (Mt. Diablo Meridian) and a small portion of lands in Clark County, Nevada, within the Coyote Springs Valley in the vicinity of Highways 168 and 93.

Some of the Applicants' future activities have the potential to impact species subject to protection under the Act. Section 10(a)(1)(B) permits non-Federal landowners to take endangered and threatened species, provided the take is incidental to otherwise lawful activities and will not appreciably reduce the likelihood for the survival and recovery of the species in the wild, among other permit issuance criteria. An applicant for a Permit under section 10 of the Act must prepare and submit to the Service for approval a Plan containing, among other things, a strategy for minimizing and mitigating all take associated with the proposed activities to the maximum extent practicable. The applicant must also ensure that adequate funding for implementation of the Plan will be provided.

The Applicants have initiated discussions with the Service regarding the possibility of a Permit and associated MSHCP for their activities on lands to be covered by a Permit. General activities proposed for Permit coverage include residential, commercial and industrial development, construction, and maintenance activities.

The Service will conduct an environmental review of the Plan and prepare an EIS. The environmental review will analyze the Applicants' proposed plan as well as a full range of reasonable alternatives and the associated impacts of each. The Service is currently in the process of developing alternatives for analysis.

Comments and suggestions are invited from all interested parties to ensure that the full range of issues related to the permit request are addressed and that all significant issues are identified. Comments or questions concerning this proposed action and the EIS should be directed to the Service (see **ADDRESSES**).

The environmental review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969 as amended (42 U.S.C. 4321 et seq.) and its implementing regulations (40 CFR parts 1500 through 1508), and with other appropriate Federal laws and regulations, policies, and procedures of the Service for compliance with those regulations. It is estimated that the draft EIS will be available for public review in early or mid-2002.
