

issued ISG DNRL–ISG–2022–01, “Safety Review of Light-Water Power Reactor Construction Permit Applications,” (ADAMS Accession No. ML22189A099), to facilitate safety reviews of LWR CP applications and to supplement the guidance in the SRP. DNRL–ISG–2022–01 describes the regulatory requirements, applicable review guidance in the SRP, and special topics for an LWR CP application. DNRL–ISG–2022–01 provides guidance on the staff review of the preliminary design information in the PSAR including the description and safety assessment of the site on which the facility is to be located. DNRL–ISG–2022–01 does not provide specific information relevant to the review of probabilistic risk assessment and alternative risk evaluations supporting an LWR CP application but points generally to the SRP to provide the NRC staff with an acceptable approach for reviewing such information. The staff has developed this draft ISG to clarify the scope and depth of the staff review of the content of risk assessment and severe accident information in a CP application for a light-water power reactor.

III. Backfitting, Forward Fitting, and Issue Finality

This draft ISG provides guidance for the NRC staff review of light-water power reactor construction permit applications. Issuance of this ISG as final would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; would not constitute forward fitting as that term is defined and described in MD 8.4; and would not affect the issue finality of any approval issued under 10 CFR part 52. The guidance would not apply to any current licensees or applicants or existing or requested approvals under 10 CFR part 52, and therefore its issuance cannot be a backfit or forward fit or affect issue finality.

For the Nuclear Regulatory Commission.

Dated: January 13, 2025.

Michelle Hayes,

Chief, Licensing and Regulatory Infrastructure Branch, Division of New and Renewed Licenses, Office of Nuclear Reactor Regulation.
