II. Introduction and Solicitation of Comments

The NRC has received, by letter dated September 18, 2013, an application to amend Source Materials License No. SUA-1475 (the UNC license) for the UNC Church Rock Mill site located in New Mexico (ADAMS Accession Nos. ML13277A287, ML13266A361). Specifically, UNC, a subsidiary of General Electric (GE), requested to extend the projected dates for (1) the completion of groundwater corrective actions, and (2) the emplacement of the final radon barrier and erosion protection for the UNC Church Rock Mill Site. On November 7, 2013, the NRC issued License Amendment No. 48, subsequently corrected by License Amendment No. 49 (ADAMS Accession Nos. ML13277A287 and ML14043A475), granting the licensee's request regarding its groundwater corrective actions. However, prior to making a final determination on the UNC's second request to extend the date for emplacing the final radon barrier and the erosion protection, the NRC is providing an opportunity for public participation required under Criterion 6A(2) of Appendix A to Title 10 of the *Code of Federal Regulations* Part 40, through the provision of this opportunity to provide comments. Specific comments are requested on the requested changes to License Conditions 35.A(3) and 35.B(1), which would extend the date for emplacement of the final radon barrier and the erosion protection from December 31, 2014 to December 31, 2019. Comments should be provided within 30 days of the publication date of this notice.

Dated at Rockville, Maryland this 17th day of April 2014.

For the Nuclear Regulatory Commission.
Andrew Persinko,
Deputy Director, Decommissioning and Uranium Recovery Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-025 and 52-026; NRC-2008-0252]

Vogtle Electric Generating Plant, Units 3 and 4; Southern Nuclear Operating Company; Turbine Building Battery Room and Electrical Changes

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and issuing License Amendment No. 18 to Combined Licenses (COL), NPF-91 and NPF-92. The COLs were issued to Southern Nuclear Operating Company (SNC), Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and City of Dalton, Georgia (the licensee), for construction and operation of the Vogtle Electric Generating Plant (VGE), Units 3 and 4, located in Burke County, Georgia. The amendment revises the UFSAR by making changes to the Non-Class 1E dc and Uninterruptible Power Supply System (EDS) and Class 1E dc and Uninterruptible Power Supply System (IDS) and making changes to the corresponding Tier 1 information in Appendix C to the Combined Licenses.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.
