

formulation and evaluation of plans for water and related land resources is 6.375 percent for fiscal year 2001.

This rate has been computed in accordance with section 80(a), Pub. L. 93-251 (88 Stat. 34) and 18 CFR 704.39, which: (1) Specify that the rate shall be based upon the average yield during the preceding fiscal year on interest-bearing marketable securities of the United States which, at the time the computation is made, have terms of 15 years or more remaining to maturity (average yield is rounded to nearest one-eighth percent); and (2) provide that the rate shall not be raised or lowered more than one-quarter of 1 percent for any year. The Treasury Department calculated the specified average to be 6.29 percent. Rounding this average yield to the nearest one-eighth percent is 6.25 percent, which exceeds the permissible one-quarter of 1 percent change from fiscal year 2000 to 2001. Therefore, the change is limited to one-quarter of 1 percent.

The rate of 6.375 percent shall be used by all Federal agencies in the formulation and evaluation of water and related land resources plans for the purpose of discounting future benefits and computing costs or otherwise converting benefits and costs to a common time basis.

Dated: November 16, 2001.

Elizabeth Cordova-Harrison,
Deputy Director, Office of Policy.
