Affected entities: Entities potentially affected by this action are business or other for-profit, and State, Local, or Tribal governments.

Title: NESHAP for Hazardous Waste Combustors (40 CFR Part 63, subpart EEE).

ICR numbers: EPA ICR No. 1773.10, OMB Control No. 2050-0171.

ICR status: This ICR is currently scheduled to expire on June 30, 2012. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA, under authority of section 112(d) of the Clean Air Act, established National Emission Standards for Hazardous Air Pollutants (NESHAPs) for hazardous waste combustors which include hazardous waste burning incinerators, cement kilns, lightweight aggregate kilns, industrial/commercial/institutional boilers and process heaters, and hydrochloric acid production furnaces. These NESHAPs are found in 40 CFR Part 63. Under these standards, hazardous waste combustors are required to meet emission levels that reflect the maximum achievable control technology.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 52 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and

review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 289.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 16.

Estimated total annual burden hours: 199,897 hours.

Estimated total annual costs:

\$21,696,865, includes \$16,010,727 for annualized labor cost, and \$5,686,138 in annualized capital or O&M costs.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: January 6, 2012.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) using Maximum Achievable Control Technology were proposed on August 4, 1998, promulgated on May 20, 1999, and amended most recently on March 22, 2001. The rule applies to ferroalloy production facilities that manufacture ferromanganese and silicomanganese that are major sources of hazardous air pollutants (HAPs) or are co-located at major sources of HAPs.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports. Respondents that are not required to conduct an initial performance test are required to notify the EPA Administrator of the initial compliance status of the source. Sources are also required to monitor and maintain records of its operations including: (1) Process or control device parameters; (2) bag leak detention systems; (3) maintenance plan for air pollution control devices (e.g., capture system and venturi scrubbers); (4) certification that monitoring devices are accurate; and (5) the implementation and corrective actions taken related to the startup, shutdown and malfunction plan and the

fugitive dust control plan. The types of periodic reports required by this regulation include: opacity-related reports; performance test results reports; immediate and periodic startup/shutdown/malfunction reports, quarterly emissions reports; capture hood inspection reports; fugitive dust operations reports; and annual compliance status reports. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP standards.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 83 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Ferroalloys production: ferromanganese, and silicomanganese plant.

Estimated Number of Respondents: 1.

Frequency of Response: Initially, annually, semiannually and quarterly.

Estimated Total Annual Hour Burden: 584 hours.

Estimated Total Annual Cost: \$55,956 in Labor costs exclusively. There are no annualized capital/startup or O&M costs associated with this ICR.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Director, Collection Strategies Division.
